Archaeological Chemistry Rsc Rsc Paperbacks:

Archaeological Chemistry A Mark Pollard, Carl Heron, 2007-10-31 The application of chemistry within archaeology is an important and fascinating area. It allows the archaeologist to answer such questions as what is this artefact made of, where did it come from and how has it been changed through burial in the ground, providing pointers to the earliest history of mankind. Archaeological Chemistry begins with a brief description of the goals and history of archaeological science and the place of chemistry within it. It sets out the most widely used analytical techniques in archaeology and compares them in the light of relevant applications. The book includes an analysis of several specific archaeological investigations in which chemistry has been employed in tracing the origins of or in preserving artefacts. The choice of these investigations conforms to themes based on analytical techniques and includes chapters on obsidian, ceramics, glass, metals and resins. Finally, it suggests a future role for chemical and biochemical applications in archaeology. Archaeological Chemistry enables scientists to tackle the fundamental issues of chemical change in the archaeological materials in order to advance the study of the past. It will prove an essential companion to students in archaeological science and chemistry, field and museum archaeologists and all those involved in conserving human artefacts.

Archaeological Chemistry (3rd Edition) A Mark Pollard, Carl Heron, Ruth Ann Armitage, 2017-01-16 Third edition of a comprehensive textbook ideal for students in archaeological science and chemistry, archaeologists and those involved in conserving human artefacts.

ARCHAEOLOGY - Volume I Donald L. Hardesty, 2010-06-15 Archaeology is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty-one Encyclopedias. Archaeology is a road for traveling into the past that is independent of and complementary to documents and memory. The archaeological record provides historical perspectives on variability and change in human life support systems with the potential for use in planning for future sustainable development. The Theme is organized into four different topics which represent the main scientific areas of the theme: Foundations of Archaeology, The Archaeology of Life Support Systems, World Cultural Heritage, Preserving Archaeological Sites and Monuments, which are then expanded into multiple subtopics each as a chapter. The first topic deals with historical, methodological and theoretical foundations of archaeology. The second topic explores the archaeological record of human life support systems and includes chapters on foraging, food production such as farming and nomadic lifestyles, civilizations, water management systems and sustainability. World cultural heritage is the third topic. Finally, the fourth topic covers the preservation of cultural memorials such as archaeological sites, landscapes and monuments. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers and Decision Makers, NGOs and GOs.

Chemistry of Paper J C Roberts, 2007-10-31 The manufacture of paper involves a large amount of chemistry including carbohydrate chemistry, pigments and resins, and colloid and surface chemistry as well as elements of environmental and analytical

chemistry Providing an overview of the making of paper from a chemical perspective this book deals with both the chemistry of paper as a material and the chemistry of its production The book explores several chemical processes involved in the production of paper the delignification of the wood fibres performed at elevated temperature and pressure the bleaching of the cellulose rich pulp using environmentally friendly systems the formation of the pulp into sheets of fibres strengthened by extensive inter fibre hydrogen bonding and finally the coating of the sheets in a manner appropriate to their end use This book is an informative and entertaining overview for students and others who require an introduction to the chemistry of paper manufacture

Organic Mass Spectrometry in Art and Archaeology Prof Maria Perla Colombini, Prof Francesca Modugno, 2009-07-28 Offers an overview of the analysis of art and archaeological materials using techniques based on mass spectrometry Illustrates basic principles procedures and applications of mass spectrometric techniques Fills a gap in the field of application on destructive methods in the analysis of museum objects Edited by a world wide respected specialists with extensive experience of the GC MS analysis of art objects Such a handbook has been long awaited by scientists restorers and other experts in the analysis of art objects

Turbanti-Memmi, 2011-01-15 The book contains the Proceedings of the 37th International Symposium on Archaeometry 12th May 2008 Siena Italy The aim of the Symposium is to promote the development and use of scientific techniques in order to extract archaeological and historical information from cultural heritage and the paleoenvironment It involves all Natural Sciences and all types of objects and materials related with human activity Papers deal with the development and or application of scientific techniques for extracting information related to human activities of the past including the biological nature of man himself and the environment in which he lived Topics include Field Archaeology and Intergrated Site Studies

Archaeo chronometry including recent developments in Radiocarbon Dating Human Environment Interactions including Geoarchaeology Palaeoclimate studies Landscape Archaeology Environmental reconstructions etc Bioarchaeology Food preparation and consumption in Antiquity the Technology and Provenance of Stone Plaster Pigments Ceramics Glazes Glass and Vitreous Materials Metals and Metallurgical Ceramics and Micro nano diagnostic techniques Conservation Science for the Cultural Heritage Evangelia A. Varella, 2012-12-15 Conservation Science is a rather innovative application of instrumental analysis with steadily increasing importance Although the first attempts for preserving material from the cultural heritage on a scientific basis are found in the 19th century pioneer chemistry years only the use of sophisticated physicochemical techniques results in effective identification and deterioration studies of monuments and objects and in reliable intervention procedures This volume allows to gain solid knowledge and improved skills on the ways separation schemes and diagnostic methodologies are applied in the safeguarding and authentication of tangible works of art as well as on the modes of implementing novel safeguarding practices built on well established principles such as the use of laser in the decontamination of objects All techniques are covered at a state of the art level while selected applications permit addressing major groups of materials and artefacts Conservation Science is nowadays taught at master s level in all developed countries and museum laboratories increasingly adopt scientific approaches in their restoration initiatives The book is intended as a valuable tool for students and professionals active in these frames In addition it provides an indispensable manual for participants in the specialized intensive courses which are systematically offered by the authors under the auspices of the relevant European network Materiality, Techniques and Society in Pottery Production Daniel Alberó Santacreu, 2014-01-01 Daniel Alberó Santacreu presents a wide overview of certain aspects of the pottery analysis and summarizes most of the methodological and theoretical information currently applied in archaeology in order to develop wide and deep analysis of ceramic pastes The book provides an adequate framework for understanding the way pottery production is organised and clarifies the meaning and role of the pottery in archaeological and traditional societies The goal of this book is to encourage reflection especially by those researchers who face the analysis of ceramics for the first time by providing a background for the generation of their own research and to formulate their own questions depending on their concerns and interests The three part structure of the book allows readers to move easily from the analysis of the reality and ceramic material culture to the world of the ideas and theories and to develop a dialogue between data and their interpretation Daniel Alberó Santacreu is a Lecturer Assistant in the University of the Balearic Islands member of the Research Group Arqueo UIB and the Ceramic Petrology Group He has carried out the analysis of ceramics from several prehistoric societies placed in the Western Mediterranean as well as the study of handmade pottery from contemporary ethnic groups in Northeast Ghana *Working Method Approach for Introductory Physical Chemistry Calculations* Brian J Hathaway, Clair Murphy, Brian Murphy, 2019-05-16 A Working Method Approach for Introductory Physical Chemistry Calculations is a concise inexpensive

introduction to first year chemistry that is aimed at students who are weak in chemistry or have no chemistry on entry to university. Such students usually find physical chemistry the most difficult part of the chemistry course and within this section numerical problem solving is an additional difficulty. The text should also be invaluable to first year intending chemists. This text provides an introduction to physical chemistry and the gas laws followed by chapters on thermodynamics, chemical equilibrium, electrochemistry and chemical kinetics. Each section involves a brief introduction followed by a representative examination question which is broken down into a proposed working method. Both short multiple choice questions and related full examination type questions are included. This book will prove invaluable to students who need encouragement in a logical approach to problem solving in physical chemistry, teaching them to think for themselves when faced with a problem.
