Archaeology Colin Renfrew, Paul G. Bahn, 2012 Provides a comprehensive textbook introduction to what archaeologists do and how they do it Updated and revised to cover new discoveries and approaches and the most recent technological innovations Theory and Perspective Chun Chen, 2025-05-05 This book draws attention to the importance of theoretical problems in archaeological research in China At present Chinese archaeology has adopted the traditional culture historical paradigm with research themes has mainly focused on chronology and cultural relationships The lack of training at theoretical thinking and scientific methods such as positivist methods and logical reasoning it has become difficult to reconstruct the processes of human behavior and social change with rigorous steps of looking at people behind the artifacts As a response to this situation this book discusses various problems that bother Chinese archaeologists in terms of the advances of archaeological theories and methods This book emphasizes the importance for theoretical guidance and problem awareness in archaeological research while illustrates this scientific philosophy with diversified case studies The purpose of this volume is trying to summarize the history and practice of Chinese archaeology in the global context It will greatly broaden the perspective of researchers all over the world with an insight into this particular practice and can also serve as a comprehensive reference work in the field of Chinese archaeology *A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD* John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation **Archaeology and State Theory** Bruce Routledge, 2013-11-21 After neo evolutionism how does one talk about the pre modern state Over the past two decades archaeological research has shifted decisively from check list identifications of the state as an evolutionary type to studies of how power and authority were constituted in specific polities Developing Gramsci's concept of hegemony this book provides an accessible discussion of general principles that serve to help us understand and organise these new directions in archaeological research Throughout this book conceptual issues are illustrated by means of case studies drawn from Madagascar Mesopotamia the
