William Zahner, 1995-07-28 The historic breakthroughs in the science of metallurgy over the last quarter century have produced an array of new metallic building materials Architects and designers now have a far broader palette of metals to choose from than at any other time in history and metal is fast becoming the star building material featured in some of today's most exciting new building projects A book whose time has come Architectural Metals is the first comprehensive guide to the metals and metallic finishes currently available for use in architecture Learn from a fourth generation expert in the field who has over the past fifteen years consulted on some of the world's most prestigious building projects Architectural Metals demystifies metals for architects artisans and design professionals providing them with a logical framework for the selection and use of the correct material for the job at hand Encyclopedic in scope Architectural Metals is an extremely user friendly working resource supplying readers with instant access to a wealth of essential information about the forms and behaviors of metallic building materials From aluminum stainless steel copper lead and zinc to new metals and finishes such as titanium pewter coated copper and colored stainless steel it describes everything architects engineers and design professionals need to know about all the common and many uncommon metals at their disposal Each chapter of Architectural Metals is devoted to a specific type of metal metallic finish or coating Each includes a historical overview environmental concerns an exhaustive description of available forms and where appropriate colors performance evaluations finishes weathering and corrosion characteristics maintenance and restoration techniques fastening welding and joining methods and more And since each metal producing industry has its own unique jargon and systems of measurement the author takes pains throughout to define relevant terms and translate measurement and thickness indices into familiar inch and millimeter scales Destined to become a standard in

the field Architectural Metals is an indispensable tool for architects, designers and artisans who work with metals. Metals is the material of our time. It enables architecture to become sculpture; it also expresses technological possibility as well as the time honored characteristics of quality and permanence. From Frank O Gehry's foreword to Architectural Metals. Written by one of the leading experts on architectural metals, this is the first comprehensive guide to the metals and metallic finishes and coatings available for use in architectural construction. Growing out of its author's experiences helping architects realize some of the most exciting designs of the past twenty years, Architectural Metals Demystifies metals for architects and design professionals. Supplies a logical framework for selecting the best materials for the job at hand. Provides instant access to everything architects and designers need to

Materials Julia McMorrough, 2006 Publisher description *Old-House Journal*, 1985-03 Old House Journal is the original magazine devoted to restoring and preserving old houses. For more than 35 years, our mission has been to help old house owners repair, restore, update and decorate buildings of every age and architectural style. Each issue explores hands-on restoration techniques, practical architectural guidelines, historical overviews and homeowner stories, all in a trusted, authoritative voice.

Architectural Graphic Standards for Residential Construction Janet Rumbarger, Richard Vitullo, 2003 Publisher description Historic Building Façades New York Landmarks Conservancy, 1997-04-24 Comprehensive in depth coverage from leading experts in the field. A historic building is a fragile resource that requires the finest care. Maintenance and rehabilitation of walls and facades call for a thorough understanding of the forces that cause deterioration, knowledge of the properties of building materials, up-to-date inspection tools and methods, and a solid command of renovation and repair techniques. In this complete reference manual, recognized experts provide state-of-the-art information and methodologies for the inspection, maintenance and restoration of historic buildings of virtually every period, style and material. Each chapter opens with a general discussion of the facade material and the ways in which structural and decorative elements are vulnerable to an array of environmental forces. After a detailed investigation of tools and techniques for inspection, the text explores planning issues for the restoration or replacement of facade components. Special features include: Separate chapters on each major type of building material: stonemasonry, brick masonry, terra cotta masonry, cast stone, mortar, concrete, cast iron, sheet metal and wood. An entire chapter on caulks and sealants. 35 original line drawings and 43 black and white photos that help visualize technical information. Selected success stories from preservation projects across the United States. For architects, building contractors and owners of historic buildings. Historic Building Facades clarifies procedures, helps identify sources of deterioration and offers solutions to even the most difficult maintenance and rehabilitation problems. It is also an excellent reference for building preservationists, architectural historians and students of building design and preservation.
