Between Empty Spaces Nathan Schwartz:

The Mystery of Human Relationship Nathan Schwartz-Salant, 2003-09-02 All human relationships are containers of emotional life but what are the structures underlying them Nathan Schwartz Salant looks at all kinds of relationships through an analyst's eye By analogy with the ancient system of alchemy he shows how states of mind that can undermine our relationships in marriage in creative work in the workplace can become transformative when brought to consciousness It is only by learning how to access the interactive field of our relationships that we can enter this transformative process and explore its mysterious potential for self realization

The Illegal Separation Katherine Lois, 2011-11-14 Ernestine Stein's world is shattered when her husband reveals his plan to separate The bright witty dyslexic middle aged Floridian takes a brief leave of absence from her job She sets out in her beige mini van with the intention of travelling south to where the highway ends A series of near disastrous events prevent her from reaching the final destination of Key West Ernie's unplanned stop over on tiny Mosquito Key results in an adventure of growth and healing amongst a community of eclectic compassionate new friends

Analyst-Patient Interaction Michael Fordham, 2003-09-02 This volume brings together Michael Fordham's key writings on analytical technique These important contributions have shaped and informed analytical technique as we find it today

The Art of Dreaming Jill Mellick, 2001-01-01 Encourages readers to integrate dreaming and creativity by playing with their dreams across a range of media including painting ceramics dancing mask making and poetry

At Home in the World Eilon Schwartz, 2010-07-02 Challenging conventional understanding of humans as selfish and competitive at their core *At Home in the World* asserts that we have evolved as a profoundly social species biologically related to the rest of the natural world and at home on the only planet for which we are adapted to live Eilon Schwartz traces the history of Darwinism examining attempts of the nineteenth and twentieth centuries to apply Darwin's theories to educational philosophy and analyzing trends since the reemergence of Darwinism toward the end of the twentieth century Identifying with the Darwinian interpretations of Peter Kropotkin John Dewey and Mary Midgley Schwartz argues for a compelling educational philosophy rooted in our best scientific understandings of human nature

The Order-Disorder Paradox Nathan Schwartz-Salant, 2017-04-11 Increasing order in a system also creates disorder this seemingly paradoxical idea has deep roots in early cultures throughout the world but it has been largely lost in our modern lives as we push for increasing systematization in our world and in our personal lives Drawing on nearly five decades of research as well as forty five years working as a psychoanalyst Nathan Schwartz Salant explains that in a world where vast amounts of order are being created through the growing success of science and technology the concomitant disorder is having devastating effects upon relationships society and the environment As a Jungian analyst with training in the physical sciences Schwartz Salant is

uniquely qualified to explore scientific conceptions of energy information and entropy alongside their mythical antecedents He analyzes the possible effects of created disorder including its negative consequences for the creator of the preceding order as well as its potentially transformative functions With many examples of the interaction of order and disorder in everyday life and psychotherapy The Order Disorder Paradox makes new inroads into our understanding of the wide ranging consequences of the order we create and its effects on others and the environment
