Influencing Social Policy Kenneth I. Maton, 2017 *Influencing Social Policy* synthesizes current knowledge about how psychologists influence social policy to serve the public interest. The volume builds upon interviews with 79 applied psychologists about their experiences in the policy domain, with special focus on the work of applied developmental psychologists, applied social psychologists, and community psychologists. Additional foundations of the volume include a review of social science scholarship across a wide range of disciplines and author Kenneth Maton's 30 years of teaching on the topic, including frequent interactions with Washington DC policy experts. Together, these sources provide in-depth information about how applied psychologists influence social policy: the factors that contribute to their success, the challenges they face, and the approaches used to address those challenges. The policy influences described span all three branches of government: legislative, executive, and judicial. The policy content areas are diverse, including the death penalty, prohibition for adolescents, early childhood education, gay marriage, gender discrimination in the workplace, health and mental health care reform, homelessness, home visiting programs, sexually abused child witness treatment, status offender diversion from the juvenile justice system, substance abuse prevention, and many others. *Influencing Social Policy* is a must-have resource for graduate students and professionals in a wide variety of disciplines with interests in influencing social policy, including psychology, education, public health, social work, policy studies, anthropology, and sociology.

Received Wisdom, Kernels of Truth, and Boundary Daniel J. Svyantek, Kevin T. Mahoney, 2013-03-01 This volume of the Research in Organizational Sciences is entitled Received Wisdom Kernels of Truth and Boundary Conditions in Organizational Studies Received wisdom is knowledge imparted to people by others and is based on authority and tenacity as sources of human knowledge Authority refers to the acceptance of knowledge as truth because of the position and credibility of the knowledge source Tenacity refers to the continued presentation of a particular bit of information by a source until this bit of information is accepted as true by receivers The problem for organizational studies however is that this received wisdom often becomes unquestioned assumptions which guide interpretation of the world and decisions made about the world Received wisdom therefore may lead to organizational practices which provide little or no benefit to the organization and potentially negative organizational effects because this

received wisdom is no longer valid The 14 papers in this volume all in some way strive to question received wisdom and present alternatives which expand our understanding of organizational behavior in some way The chapters in this volume each strive to present new ways of understanding organizational constructs and in so doing reveal how received wisdom has often led to confirmation bias in organizational science The knowledge that some perceived truths are actually the products of received wisdom and do not stand up to close scrutiny shakes up things within research areas previously thought settled allowing new perspectives on organizational science to emerge The Psychology of Gender Vicki S.
