Beyond Conceptual Dualism Beyond Conceptual Dualism:

Beyond Conceptual Dualism Giuseppe Vicari, 2008 This book is a systematic analysis of John R Searle's philosophy of mind Searle's view of mind as a set of subjective and biologically embodied processes can account for our being part of nature qua mindful beings This model finds support in neuroscience and offers reliable solutions to the problems of consciousness mental causation and the self

Beyond Orientalism Eli Franco, Karin Preisendanz, 2023-12-14 Wilhelm Halbfass philosopher and Indologist is a committed participant in the dialogue between India and Europe whose reflections on the Indian tradition and its Western perception are accompanied by reflection on and critical examination of the Western tradition In this innovative combination of Indological research and philosophical hermeneutical research in the history of ideas he demonstrates a purpose more ambitious and a scope wider than Edward Said's who constructed the Western study of the so called Orient as an attempt to deprive it of its identity and sovereignty and who perceived the pursuit of Oriental Studies in Western universities to be an extension of a fundamentally political will to power and domination Without denying the domination of the dialogue between India and Europe by the West Halbfass goes beyond that to show a different way of approaching Indian thought he strives to establish the presuppositions and prerequisites that would make a true dialogue and mutual understanding between Indian and Western intellectual cultures possible The papers in the present volume originate from twenty three scholars of Indology philosophy religious studies comparative theology classics folkloristics and political theory working in eleven countries spread over three continents They address central issues of Halbfass work his critical responses to them commence with an extensive essay in which he assesses in a masterly manner the state of Indian studies almost twenty years after the publication of Said's Orientalism

Beyond Transcendence in Law and Philosophy Louis E. Wolcher, 2023-03-31 What is the law of the law What produces our craven subservience to linguistic norms and our shocking indifference to the phenomenon of universal suffering In a path breaking new work of philosophy Louis Wolcher seeks to answer these questions from the standpoint of Zen Buddhism Bringing an Eastern sensibility into contact with three of the most important themes in Western philosophy *Beyond Transcendence in Law and Philosophy* meticulously investigates three of the twentieth century's most important philosophers Martin Heidegger on being Emmanuel Levinas on ethics and Ludwig Wittgenstein on language In the context of the larger Western obsession with transcending the ordinary Louis Wolcher argues that the yearning for transcendence is born of the illusion that there is a fundamental difference between the ordinary and the profound Employing Zen koans and stories to advance a deflationary view of language and knowledge he goes on to argue that the norms of transcendence to which we cling are not eternal truths but artefacts of desperate minds adrift on a sea of impermanence What used to seem so majestically True Right and Just thus shows itself to be utterly mundane as merely true right and just What is left however is not nihilism for clinging to a view of nothingness is just as deluded as clinging to a view of somethingness but rather a new beginning of compassionate concern for the suffering of

others Beyond Transcendence in Law and Philosophy is a strikingly original synthesis of Eastern and Western thought It will enlighten philosophers and legal theorists as well as those who are interested in or open to the insights of Zen Buddhism

Beyond Personal Identity Gereon Kopf,2012-12-06 Applies Dogen Kigen s religious philosophy and the philosophy of Nishida Kitaro to the philosophical problem of personal identity probing the applicability of the concept of non self to the philosophical problems of selfhood otherness and temporality which culminate in the conundrum of personal identity

Cognition, Content, and the a Priori Robert Hanna,2015 Robert Hanna works out a unified contemporary Kantian theory of rational human cognition and knowledge which develops new lines of thought in philosophy of perception Along the way he provides original accounts of intentionality sense perception and perceptual knowledge the analytic synthetic distinction the nature of logic and the a priori *New Perspectives on Pragmatism and Analytic Philosophy*. Rosa M. Calcaterra,2011-04 The strong influence of pragmatism in the early 20th century international debate its subsequent and apparently inexorable decline and its recent revival are intertwined with the fate of other currents of thought that have marked the development of contemporary philosophy This volume clarifies the most recent events of this development focusing on key theoretical issues common both to American classic philosophical tradition and analytical thought Many essays in this volume belong to what we can call new pragmatism namely a pragmatist perspective that is different from the postmodernist neo pragmatism la Rorty The volume shows that both pragmatists and analytic thinkers stress the importance of logic and scientific method in order to deal with philosophical problems and seek for a clarification of the relation between our ethical values and our understanding of natural facts Moreover the anti skeptic attitude that characterizes pragmatism as well as most part of analytic philosophy and their common attention to the problems of language and communication are emphasized The more sophisticated tools for addressing both theoretical and methodological problems developed by analytic philosophy are pointed out and the essays show the possible integration of these two forms of speculation that for too a long time mutually disregarded one another *The Unconscious in Philosophy, and French and European Literature* Fernand Vial,2009 This book traces the idea of the unconscious as it emerges in French and European literature It discusses the functioning of the normal unconscious mind and provides examples of the abnormal unconscious in poems and literature Psychiatric cases as they are understood today are illustrated as mirrored in literature describing the functioning of the disturbed mind The Philosophy of Viagra ,2011-01-01 The impotency remedy Viagra is the fastest selling drug in history It has grown beyond being simply a medical phenomenon but has achieved the status of cultural icon appearing on television as a pretext for jokes or even as a murder weapon Viagra has socio cultural implications that are not limited to sexuality The Philosophy of Viagra offers a unique perspective as it examines the phenomenon of Viagra through ideas derived from more than two thousand years of philosophical reasoning In philosophy Eros has always had a central position Since Plato philosophy has held that desire is not only a medical but also a spiritual phenomenon and that scientific explanations

claiming to give an exhaustive account of erotic perception are misleading Philosophical ideas are able to debunk various scientific rationalizations of sexuality one of which is the clinical sexological discourse on Viagra In this volume several authors interpret Viagra through the lens of classical philosophy explicating the themes of immortality and hedonism Others offer psychoanalytical considerations by confronting clinical sexology with psychological realities Still others evoke intercultural aspects revealing the relative character of potency that the phenomenon of Viagra attempts to gloss over

A Pluralist Theory of the Mind David Ludwig, 2015-10-22 This book challenges common debates in philosophy of mind by questioning the framework of placement problems in contemporary metaphysics The author argues that placement problems arise when exactly one fundamental ontology serves as the base for all entities and will propose a pluralist alternative that takes the diversity of our conceptual resources and ontologies seriously This general pluralist account is applied to issues in philosophy of mind to argue that contemporary debates about the mind body problem are built on this problematic framework of placement problems The starting point is the plurality of ontologies in scientific practice Not only can we describe the world in terms of physical biological or psychological ontologies but any serious engagement with scientific ontologies will identify more specific ontologies in each domain For example there is not one unified ontology for biology but rather a diversity of scientific specializations with different ontological needs Based on this account of scientific practice the author argues that there is no reason to assume that ontological unification must be possible everywhere Without this ideal the scope of ontological unification turns out to be an open empirical question and there is no need to present unification failures as philosophically puzzling placement problems

Beyond Heaven and Earth Gabriel Levy, 2022-02-01 An approach to understanding religion that draws on both humanities and natural science but rejects approaches that employ simple monisms and radical dualisms In *Beyond Heaven and Earth* Gabriel Levy argues that collective religious narratives and beliefs are part of nature they are the basis for the formation of the narratives and beliefs of individuals Religion grows out of the universe but to make sense of it we have to recognize the paradox that the universe is both mental and material or neither We need both humanities and natural science approaches to study religion and religious meaning Levy contends but we must also recognize the limits of these approaches First we must make the dominant metaphysics that undergird the various disciplines of science and humanities more explicit and second we must reject those versions of metaphysics that maintain simple monisms and radical dualisms Bringing Donald Davidson s philosophy a form of pragmatism known as anomalous monism to bear on religion Levy offers a blueprint for one way that the humanities and natural sciences can have a mutually respectful dialogue Levy argues that in order to understand religions we have to take their semantic content seriously We need to rethink such basic concepts as narrative fiction information agency creativity technology and intimacy In the course of his argument Levy considers the relation between two closely related semantics fiction and religion and outlines a new approach to information He then applies his theory to discrete cases ancient texts modern media and intimacy

Postmodern Theater and the Void of Conceptions William S. Haney II, 2009-03-26 Different symbolic traditions have different ways of describing the shift of awareness toward sacred events While not conforming to familiar states of phenomenality this shift of awareness corresponds to Turner's liminal phase Artaud's metaphysical embodiment Grotowski's translumination Brook's holy theater and Barba's transcendent theater all of which are linked to the Advaitan taste of a void of conceptions This book argues that by allowing to come what Derrida calls the unsayable the theater of Tom Stoppard David Henry Hwang Caryl Churchill Sam Shepard Derek Walcott and Girish Karnad induces characters and spectators to deconstruct habitual patterns of perception attenuate the content of consciousness and taste the void of conceptions As the nine plays discussed in this book suggest the internal observer lies behind all cultural constructs as a silent beyondness and immanently within knowledge as its generative condition of unknowingness The unsayable and the language used to convey it that Derrida finds in literature has clear affinities with the Brahman Atman of Advaita Vedanta Derridean deconstruction contains as a subtext the structure of consciousness that it both veils with the undecidable trappings of the mind and allows to come as an unsayable secret through a play of difference Although Derrida views theater and the text as mutually deconstructing and claims that presence or unity has always already begun to represent itself the six playwrights discussed here show that cultural performance indeed points through its universally ambiguous and symbolic types toward a transverbal transcultural wholeness

The Living Image in the Middle Ages and Beyond Kamil Kopania, Henning

Laugerud, Zuzanna Sarnecka, 2025-02-25 This edited volume discusses images that bleed speak cry move and behave in ways we usually attribute to living creatures Living images have been the object of devotion as well as targets of destruction and they have been marginalised in both culture and cultural studies for their ambivalence as well as their transgressive nature But what is it that makes images the loci of such powerful properties The present volume is an attempt to recuperate the living image draw it from the margins and reilluminate its importance for cultural history The title of this book reflects the ambition of the contributions to navigate between the Middle Ages of the past and the Middle Ages of the present Our aim is to provide new theoretical reflections and methodologies concerning the study of material agency and living images both historically and today The chapters include close examination of surviving objects and archival research as well as theoretical reflections and span chronologically and geographically across Europe from North to South medieval to modern The book will be of interest to scholars working in art history medieval studies material culture theatre studies and religious history

The Adventure of Education Adam Christian Scarfe, 2009 This book on process relational philosophy of education suggests that the notion of Adventure is foundational for the advancement of knowledge Learning teaching and research are best conceived as rhythmic and relational processes involving curiosity imagination valuation creativity and self realization Thus construed contemporary educational practices can be revitalized from pedagogies of information retention and the current overemphasis on analytic precision

Environmental Ethics King-Tak Ip, 2009 The nine essays in this volume

explore the foundations of environmental ethics in the Western philosophy as well as from the perspectives of Christianity Islam Daoism and Buddhism Arguments and Analysis in Bioethics ,2010-01-01 Is there any justification for the common practice of allocating expensive medical resources to rescue a few from rare diseases when those resources could be used to treat devastating diseases that affect the many Does the use of Prozac and other anti depressants make us inauthentic beings Is it immoral and irrational to have children What is the force of examples and counterexamples in bioethics What are the relevance of moral intuition and the role of empirical evidence in bioethical argument What notion of function underlies accounts of the distinction between normality and disease and between therapy and enhancement Is there an inherent conflict between research aimed at therapy and research aimed at gaining knowledge such that the very notion of therapeutic research is an oxymoron The twenty one chapters in this volume strive through the use of high quality argument and analysis to get a good deal clearer concerning a range of issues in bioethics and a range of issues about bioethics The essays are provocative indeed some quite radical and disturbing as they call into question many common methodological and substantive assumptions in bioethics **Metacide** ,2010-01-01 If philosophy addresses concrete ethical challenges then what shifts in basic concepts must be made to the discipline in the darkness of our genocidal world What anti genocidal strains are in Western philosophy Are we really rejects and or still of intrinsic worth when we fail our excellence tests How are we represented and how do we participate in representations Are representational forms historical in origin and development Is genocide indissolubly linked to our degradation and destruction of animals Can one slaughter and eat one s partners in a social bond If so what does this tell us about the socio political world we have formed Is there a deep center metacide in our culture from which genocide receives its impulse These are some of the pivotal questions addressed in the thirteen thought provoking essays of this volume *For Our Children* Anders Nordgren,2010-01-01 This book provides an overview of different ethical views on animal experimentation Special attention is given to the production and experimental use of genetically modified animals It proposes a middle course between those positions that are very critical and those very positive This middle course implies that animal experiments originating in vital human research interests are commonly justified provided that animal welfare is taken seriously Some animal experiments are not acceptable since the expected human benefit is too low and the animal suffering too severe This position is supported by an argument from species care according to which we have special obligations to our children and other humans due to special relations The book tries to bridge the gap between animal ethics and animal welfare science by discussing various conceptions of animal welfare function centered feeling based and those focusing on natural living The theoretical starting point is imaginative casuistry This approach stresses the role of moral imagination and metaphor in ethical deliberation accepts a plurality of values and recognizes the importance of case by case balancing In the discussion of genetically modified animals both intrinsic ethical concerns and animal welfare concerns are addressed *Necessity and Truthful Fictions* Amihud Gilead,2009-01-01 This

book discovers areas and themes especially in philosophical psychology for novel observations and investigations the diversity of which is systematically unified within the frame of the author's original metaphysics panenmentalism The book demonstrates how by means of truthful fictions we may detect meaningful possibilities as well as their necessary relationships that otherwise could not be discovered
