Beyond Confrontation Learning Conflict Resolution In The Post Cold War Era:

Beyond Confrontation John A. Vasquez, 1995 An interdisciplinary approach to the politics of peace *The Multiple Realities of International Mediation* Marieke Kleiboer, 1998 Recent experiences have demonstrated once again the complexities of brokering an end to deep rooted ethnic and international conflicts as well as the difficulties of evaluating the outcomes of third party interventions Addressing these issues this book offers a sophisticated approach to assessing mediation efforts and to reconstructing and interpreting mediation processes Chinese National Security Decisionmaking Under Stress Andrew Scobell, 2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century s first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of china s behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world *War and Peace in International Rivalry* Paul Diehl, Gary Goertz, 2001-10-22 How do enduring rivalries between states affect international relations **The Power of Power Politics** John A. Vasquez, 1998 In this new and much expanded edition of his classic study John Vasquez examines the power of the power politics perspective to dominate inquiry and evaluates its ability to provide accurate explanations of the fundamental forces underlying world politics *Mediating International Crises* Jonathan Wilkenfeld, Kathleen Young, David Quinn, Victor Asal, 2007-05-07 This book investigates the crisis management mechanism mediation by third parties to determine the effectiveness of mediation efforts in crisis negotiations **International Mediation Bias and Peacemaking** Isak Svensson, 2014-11-27 This book examines the effect of biased and neutral mediators in civil wars Based on analysis of both global data and case studies of contemporary peace processes including India and Norway in Sri Lanka China in Cambodia US in Israel Palestine and Russia in Georgia the book makes two main contributions First it explores the role of biased mediators in contemporary peace processes The author develops a theory explaining why biased mediators are more effective than their neutral counterparts and the book identifies four different mechanisms through which biased mediators can be effective peace brokers By developing a comprehensive set of mechanisms to explain bias mediation the work deepens understanding of biased mediators in general and their role in resolving civil conflict in particular The second contribution offered is a novel way of measuring mediation success Previous research has concentrated on settlement behavior or implementation While these conceptualisations of mediation success all have merit they fail to address how the basic incompatible positions are regulated This book focuses on mediators ability to regulate core compatibilities by crafting institutional peace arrangements that generally are considered to enhance the prospect for durable peace This approach has wider implications for peace and conflict research by bringing together research on durability of peace and studies on international mediation two fields of research which hitherto have been kept apart This book will be of much interest to

students of international mediation conflict management civil wars security studies and IR in general Transforming NATO
Ivan Dinev Ivanov, 2011-07-16 Transforming NATO New Allies Missions and Capabilities by Ivan Dinev Ivanov reveals that in order to understand the complexity of NATO's transformation one must explore the management of allied relations through two mutually reinforcing theoretical lenses club goods theory and the concept of complementarities The findings of this research have implications for international security alliance management NATO politics transatlantic relations and broader international relations theory *The Transformation of Peace* Oliver P. Richmond, 2024-06-06 The second edition of this influential book examines the transformation of the discourse and praxis of peace from its early beginnings in the literature on war and power to the development of intellectual and theoretical discourses of peace contrasting this with the development of practical approaches to peace and examining the intellectual and policy evolution regarding peace Now with reflections on each chapter and a new introduction and conclusion the book is essential reading for researchers and students of peace and conflict studies and beyond **Constructive Interventions** Lars Kirchhoff, 2008-01-01 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution ADR are often seen as antagonistic trends This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method's critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for

this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace

Rediscovering Fuller W. J. Witteveen, Wibren van der Burg, 1999 Lon Fuller one of the great American jurists of this century is often remembered only for his stand on the morality of law in the Fuller Hart debate Rediscovering Fuller considers the full range of Fuller's writings from his early engagement with legal fictions and his critique of legal positivism to his later work on implicit law and the art of institutional design Contributors from the fields of both civil law and common law argue that Fuller's insights are highly relevant to contemporary concerns The book contains essays by K Winston D Dyzenhaus P Cliteur F Schauer Beyond the Fuller Hart Debate P Westerman W van der Burg D Luban Moralities of Law G Postema P Teachout Implicit Law R Macdonald W Witteveen J Allison M Hertogh K Soltan The Art of Institutional Design J Allan F Mootz J Vining Law's Dialogue and a preface by Ph Selznick At some point in the future when we become more open to the moral relevance of social inquiry more empirical in our study of philosophical issues more capable of uniting moral and social theory Lon Fuller's work will stand as a landmark This volume will help show the way Ph Selznick **A Natural**

History of Peace Thomas Gregor, 1996 A stimulating and innovative consideration of the concept causes and practice of peace in societies both ancient and modern human and primate We know a great deal about aggression conflict and war but relatively little about peace partially because it has been such a scarce phenomenon throughout history and in our own times Peace is more than the absence of war Peace requires special relationships structures and attitudes to promote and protect it A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology primatology archeology psychology political science and economics Among other notable features this volume offers a major theory concerning the evolution of peace and violence through human history an in depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization a comparative examination of peace from the perspective of change including the transition of one of the world's most violent societies to a relatively peaceful culture and the decision making process of terrorists who abandon violence and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations Mitigating Conflict Henry F.

Carey, Oliver P. Richmond, 2004-08-02 Drawing upon the writings of academics and activists this collection explores the roles that have emerged for NGOs as they have engaged more with peacekeeping and peacebuilding initiatives in various locations around the world *Israeli-Palestinian Negotiations in the 1990s: How NGOs Facilitated the Peace Process* Tilman

Pradt, 2012-08 Non governmental organisations NGOs have become important actors in the globalised world They run aid

and relief programmes in the poorest countries support international institutions like the United Nations or are watchdogs of them for example watchdogs of the Bretton Woods institutions In doing so NGOs naturally work permanently with state agencies and it is probably hard to find an NGO which is totally free of any governmental support in financial logistical or informative matters Thus there are strong NGO government connections on a daily work basis NGOs run multiple attempts to contribute to the resolution of conflicts on all political levels They bring together people on the grass root level they try to influence high officials through public pressure and they organise conferences and discussions with members and consultants of the concerned parties The latter approach is analysed in this study But how do NGOs influence the level of official international relations To which degree can NGOs improve the relations of two conflicted parties especially when the conflict is protracted and severe The aim of this book is to define the preconditions of successful NGO mediation to measure the NGO influence as an antecedent condition for successful mediation and to exhibit its limits The underlying assumption is that conflict resolution is more likely if NGO mediation supports this attempt This approach can be labelled as an assumption of constant effect since the focus is on understanding the NGOs influence on international conflict resolution *Peace Watch*, 1995

The International Arbitration of Territorial Disputes Asaf Siniver, 2024-06-05 Asaf Siniver provides a systematic and comparative analysis of the role of international arbitration in the settlement of interstate territorial disputes He engages with International Relations IR and International Law IL scholarships to locate the unique characteristics of arbitration as a legal method of dispute settlement distinct from the other legal method of adjudication judicial settlement and diplomatic methods such as negotiation and mediation A novel framework examines both political and legal dimensions to analyse i under what conditions states are more likely to pursue a legal settlement of their territorial dispute via arbitration as opposed to the more popular diplomatic method of mediation and ii what explains compliance with or defiance of international law in such cases In so doing the author sets to reclaim the sui generis nature of arbitration as a unique legal political method which enables the disputants to maintain the considerable flexibility and autonomy often found in mediation whilst providing the same final and legally binding solution that adjudication offers Exploring a wide range of primary sources including interviews archival research and official documents and employing qualitative research methods Siniver applies the analytical framework to four contemporary cases of international arbitration the arbitration over the Rann of Kutch between India and Pakistan 1966 68 the Beagle Channel arbitration between Chile and Argentina 1971 77 the Taba arbitration between Egypt and Israel 1986 88 and the South China Sea arbitration between The Philippines and China 2013

16 **Long-term Conflict Prevention and Industrial Development** Ralf Bredel, 2021-10-25 **Elgar Handbook of Civil War and Fragile States** Graham K. Brown, Arnim Langer, 2012-01-01 The Elgar Handbook of Civil War and Fragile States is an impressive volume Its distinguished contributors offer a rich menu of courses ranging from conflict and war to peacemaking transitional justice peacekeeping and powersharing Encyclopedic in its scope the volume encompasses many

different approaches to stimulate and provoke the careful reader. It serves up a feast for scholars and policymakers alike. Donald L. Horowitz, Duke University, US. The Elgar Handbook of Civil War and Fragile States brings together contributions from a multidisciplinary group of internationally renowned scholars on such important issues as the causes of violent conflicts and state fragility, the challenges of conflict resolution and mediation and the obstacles to post-conflict reconstruction and durable peace building. While other companion volumes exist, this detailed and comprehensive book brings together an unrivalled range of disciplinary perspectives including development economists, quantitative and qualitative political scientists and sociologists. Topical chapters include Post Conflict and State Fragility, Ethnicity, Human Security, Poverty and Conflict, Economic Dimensions of Civil War, Climate Change and Armed Conflict, Rebel Recruitment, Education and Violent Conflict, Obstacles to Peace, Settlements and many others. With detailed and comprehensive coverage, this Handbook will appeal to postgraduate and undergraduate students, policymakers, researchers and academics in conflict and peace studies, international relations, international politics and security studies.

International Politics of Recognition
 Thomas Lindemann, Erik Ringmar, 2015-11-17. The origins of international conflict are often explained by security dilemmas, power rivalries or profits for political or economic elites. Common to these approaches is the idea that human behaviour is mostly governed by material interests which principally involve the quest for power or wealth. The authors question this truncated image of human rationality. Borrowing the concept of recognition from models developed in philosophy and sociology, this book provides a unique set of applications to the problems of international conflict and argues that human actions are often not motivated by a pursuit of utility maximisation as much as they are by a quest to gain recognition. This unique approach will be a welcome alternative to the traditional models of international conflict.

Resolving Environmental Disputes
 Roger Sidaway, 2013-06-17. Resolving Environmental Disputes presents detailed case studies from the key contemporary themes in resource management and environmental protection such as access to the countryside for recreation, sustainable forestry, pollution and risks to health and coastal zone management. The book spans both theory and practice in assessing the relationship between public participation and mediation. It is structured around detailed case studies from Britain, the USA and the Netherlands which are interspersed with chapters providing explanation and interpretation of the theoretical and practical issues involved. In reviewing the state of environmental conflict resolution, the author examines how and why conflicts occur and whether approaches to conflict resolution based on consensus building could be more widely applied.
