Beyond Obamacare Life Death And Social Policy:

Beyond Obamacare James S. House, 2015-05-31 Health care spending in the United States today is approaching 20 percent of GDP yet levels of U S population health have been declining for decades relative to other wealthy and even some developing nations How is it possible that the United States which spends more than any other nation on health care and insurance now has a population markedly less healthy than those of many other nations Sociologist and public health expert James S House analyzes this paradoxical crisis offering surprising new explanations for how and why the United States has fallen into this trap In Beyond Obamacare House shows that health care reforms including the Affordable Care Act cannot resolve this crisis because they do not focus on the underlying causes for the nation s poor health outcomes which are largely social economic environmental psychological and behavioral House demonstrates that the problems of our broken health care and insurance system are interconnected with our large and growing social disparities in education income and other conditions of life and work and calls for a complete reorientation of how we think about health He concludes that we need to move away from our misguided and almost exclusive focus on biomedical determinants of health and to place more emphasis on addressing social economic and other inequalities House's review of the evidence suggests that the landmark Affordable Care Act of 2010 and even universal access to health care are likely to yield only marginal improvements in population health or in reducing health care expenditures In order to rein in spending and improve population health we need to refocus health policy from the supply side which makes more and presumably better health care available to more citizens to the demand side which would improve population health though means other than health care and insurance thereby reducing need and spending for health care House shows how policies that provide expanded educational opportunities more and better jobs and income reduced racial ethnic discrimination and segregation and improved neighborhood quality enhance population health and quality of life as well as help curb health spending He recommends redirecting funds from inefficient supply side health care measures toward broader social initiatives focused on education income support civil rights housing and neighborhoods and other reforms which can be paid for from savings in expenditures for health care and insurance A provocative reconceptualization of health in America Beyond Obamacare looks past partisan debates to show how cost efficient and effective health policies begin with more comprehensive social policy reforms To Heal Humankind Adam Gaffney, 2017-07-06 The Right to Health in the International Bill of Rights Latin America and the Right to Healthcare Alma Ata and the Advent of Primary Care in the Cold War Return to the US From Medicare to Universal Healthcare Return to Latin America Alma Ata in Nicaragua 7 The Right to Health in the Age of Neoliberalism Exit Alma Ata Enter the World Bank Healthcare and Neoliberalism A Return to Chile Nicaragua China Russia and Cuba HIV AIDS and the Human Right to Health Movement The Right to Health in Law International and Domestic Medicines and the Rights Commodity Dialectic The Case of South Africa Rights Litigation and Privatization Brazil Colombia India and Canada The Healthcare Rights Commodity

health are also closely associated with their social networks and the neighborhoods in which they live Even though strong relationships with spouses families and friends can moderate some of the health declines associated with aging women and especially women of color are more likely than men to live alone and often cannot afford home health care services a combination that can be isolating and even fatal Finally social inequalities affect the process of dying itself with white and affluent seniors in a better position to convey their end of life preferences and use hospice or palliative care than their disadvantaged peers Carr cautions that rising economic inequality the lingering impact of the Great Recession and escalating rates of obesity and opioid addiction among other factors may contribute to even greater disparities between the haves and the have nots in future cohorts of older adults She concludes that policies such as income supplements for the poorest older adults expanded paid family leave and universal health care could ameliorate or even reverse some disparities A comprehensive analysis of the causes and consequences of later life inequalities Golden Years demonstrates the importance of increased awareness strong public initiatives and creative community based programs in ensuring that all Americans have an opportunity to age well **The Danger Zone Is Everywhere** George Lipsitz, 2024-08-27 Compellingly argues that good health is as much social as it is biological and that the racial health gap and the racial wealth gap are mutually constitutive The Danger Zone Is Everywhere shows that housing insecurity and the poor health associated with it are central components of an unjust destructive and deadly racial order Housing discrimination is a civil and economic injustice but it is also a menace to public health With this book George Lipsitz reveals how the injuries of housing discrimination are augmented by racial bias in home appraisals and tax assessments by the disparate racialized effects of policing sentencing and parole and by the ways in which algorithms in insurance and other spheres associate race with risk But The Danger Zone Is Everywhere also highlights new practices emerging in health care and the law emphasizing how grassroots community mobilizations are creating an active and engaged public sphere constituency promoting new forms of legislation litigation and organization for More than Medicine Robert M.
