Beyond Tradeoffs Market Reforms And Equitable Growth In Latin America:

Social Development in Latin America Joseph S. Tulchin, Allison M. Garland, 2000 This volume provides a wide ranging analysis of social welfare reform in Latin America examining in particular the politics involved in implementing difficult and controversial social policies that often pit the middle strata of society represented by powerful stakeholders against the poor

Facing Up to Inequality in Latin America Inter-American Development Bank, 1998 Statistical appendix pp 203 282

Post-Stabilization Politics in Latin America Carol Wise, Riordan Roett, 2003-07-28 Over the last twenty years Latin America has seen a definitive movement toward civilian rule Significant trade fiscal and monetary reforms have accompanied this shift exposing previously state led economies to the forces of the market Despite persistent economic and political hardships the combination of civilian regimes and market based strategies has proved to be remarkably resilient and still dominates the region This book focuses on the effects of market reforms on domestic politics in Latin America While considering civilian rule as a constant the book examines and compares domestic political responses in six countries that embraced similar packages of reforms in the 1980s Argentina Brazil Chile Mexico Peru and Venezuela The contributors focus on how ambitious measures such as liberalization privatization and deregulation yielded mixed results in these countries and in doing so they identify three main patterns of political economic adjustment In Argentina and Chile the implementation of market reforms has gone hand in hand with increasingly competitive politics In Brazil and Mexico market reforms helped to catalyze transitions from entrenched authoritarian rule Finally in Peru and Venezuela traditional political systems have collapsed and civilian rule has been repeatedly challenged The contributors include Carol Wise University of Southern California Karen L Remmer Duke University Carol Graham Brookings Institution Stefano Pettinato United Nations Development Programme Consuelo Cruz Tufts University Juan E Corradi New York University Delia M Boylan Chicago Public Radio Riordan Roett Johns Hopkins University Mart n Tanaka Institute for Peruvian Studies Lima and Kenneth M Roberts University of New Mexico

The Market and the Masses in Latin America Andy Baker, 2009-03-23 What do ordinary citizens in developing countries think about free markets Conventional wisdom views globalization as an imposition on unwilling workers in developing nations concluding that the recent rise of the Latin American left constitutes a popular backlash against the market In this book Baker marshals public opinion data from eighteen Latin American countries to show that most of the region s citizens are enthusiastic about globalization because it has lowered the prices of many consumer goods and services while improving their variety and quality Among recent free market reforms only privatization has caused pervasive discontent because it has raised prices for services like electricity and telecommunications Citizens sharp awareness of these consumer consequences informs Baker s argument that a political economy of consumption has replaced a previously dominant politics of labor and class in Latin America

Beyond Lending Guillermo Perry, 2009 As the drafts of this book were coming together in early 2008 Guillermo Perry argued that developing countries remained highly vulnerable

to external risks such as commodity price declines capital flow reversals and natural disasters The economic crisis that has since ensued could not have proved his analysis more true rather than fall into complacency as the short term demand for traditional loans increases multilateral development banks MDBs should move beyond lending to provide innovative risk management tools for developing countries to manage volatility and create long term stability Book jacket After the Washington Consensus Pedro-Pablo Kuczynski, John Williamson, 2003-03-26 This volume is a successor of sorts to the Institute's 1986 volume *Toward Renewed Economic Growth in Latin America* which blazed the trail for the market oriented economic reforms that were adopted in Latin America in the subsequent years It again presents the work of a group of leading Latin American economists who were asked to think about the nature of the economic policy agenda that the region should be pursuing after a decade that was punctuated by crises achieved disappointingly slow growth and saw no improvement in the region's highly skewed income distribution The study diagnoses the first generation liberalizing and stabilizing reforms that are still lacking the complementary second generation institutional reforms that are necessary to provide the institutional infrastructure of a market economy with an egalitarian bias and the new initiatives that are needed to crisis proof the economies of the region to end its perpetual series of crises Contributors Daniel Artana Nancy Birdsall Roberto Bouzas Saúl Keifman Pedro Pablo Kuczynski Ricardo López Murphy Claudio de Moura Castro Fernando Navajas Patricio Navia Liliana Rojas Suarez Jaime Saavedra Miguel Székely Andrés Velasco John Williamson and Laurence Wolff *Politics of Labor Reform in Latin America* Maria Lorena Cook, 2010-11-01 **Market Reform in Society** Moisés Arce, 2009-03-02 Going beyond the usual state centric approach to the study of the politics of neoliberal reform Moisés Arce emphasizes the importance of understanding the interaction between state reformers and collective actors in society In *Market Reform in Society* he helpfully focuses our attention on how various societal groups are affected by different types of reform and how their responses in turn affect the state's subsequent pursuit of reform As a country characterized by strong state autonomy and widespread disintegration of civil society and representative institutions during the 1990s when Alberto Fujimori was president Peru serves as an excellent case for examining how collective actors can succeed in influencing the reform process Arce compares reforms in three areas taxation pension privatization and social sector programs in poverty alleviation and health decentralization Differences in the concentration or dispersion of costs and benefits he shows affected incentives for groups to form and engage in collective action for supporting opposing or modifying the reforms **The Egyptian Economy** Hanaa Kheir-El-Din, 2008-02-01 The Egyptian economy has undergone several reforms since the early 1990s However it was not until recently that the reform process picked up speed and intensity Key initiatives included shifting to a flexible exchange rate regime liberalizing trade revising and reducing the tariff structure and improving the income tax system Plans are underway to restructure the financial sector and privatize most state owned enterprises This volume aims to evaluate the impact of recent reform policies and highlight priority areas for further reform at the macroeconomic and

institutional levels Topics addressed include growth distribution and poverty reduction monetary policy and the impact of exchange rate liberalization unemployment and job creation and the new pension system The objective is to contribute to ongoing efforts to stimulate growth and employment ensure fiscal sustainability improve the external sector and address issues related to poverty and income distribution The volume focuses on the health and energy sectors in Egypt with the aim of assessing each sector in three areas financing organization and policy management in order to suggest ideas for reform in light of international experience Contributors Ragui Assaad Omneia Helmy Abdallah Shehata Khattab Hanaa Kheir El Din Aart Kraay Heba El Laithy Nihal El Megharbel Mai El Mossallamy Tarek Abdelfattah Moursi Sarah El Nashar Tarek Selim Enas Zakareya *Happiness, Economics and Politics* Amitava Krishna Dutt, Benjamin Radcliff, 2009-01-01 For those already drawn by the allure of happiness studies Dutt and Radcliff here provide a rich tour of the frontier in the field And for curmudgeons this work goes far to defuse the skeptical reflex It is subtle intelligent wide ranging informative and even readable throughout James K Galbraith The University of Texas at Austin US This timely and important book presents a unique study of happiness from both economic and political perspectives It offers an overview of contemporary research on the emergent field of happiness studies and contains contributions by some of the leading figures in the field General issues such as the history and conceptualization of happiness are explored and the underpinning theories and empirics analyzed The ways in which economic and political factors both separately and interactively affect the quality of human life are examined illustrating the importance of a self consciously multi disciplinary approach to the field In particular the effects of consumption income growth inequality discrimination democracy the nature of government policies and labor organization on happiness are scrutinized In conclusion the contributors prescribe what can and should be done at individual and societal levels to improve human well being and happiness This wide ranging and interdisciplinary book makes a unique contribution to the literature As such it will prove a fascinating read for students and scholars of economics political science psychology sociology and of course to those with a special interest in the analysis of happiness and human well being **World Development Report 2006** World Bank, 2005-09-28 The World Development Report 2006 Equity and Opportunity presents a social development strategy organized around the themes of social inclusion cohesion and accountability It examines equality of opportunities a potentially important factor affecting both the workings of the investment environment and the empowerment of the poor by building on and extending existing accountability frameworks presented in the 2005 Report The Report is divided into three parts Part I describes patterns of inequality in a range of variables both at the national and global level incomes educational achievements health indicators power and influence Part II highlights reasons why some levels of inequality in the variables presented in Part I may be too high whether for intrinsic reasons or because they harm the attainment of competing values such as the level of goods and services in the economy Part III discusses policies that affect the relationship between equity and the development process at a national and global level This section includes

policies that could help reduce the levels of some intermediate inequalities and focuses on circumstances in which these policies form the basis for more rapid overall development and faster poverty reduction Now in its twenty eighth edition theWorld Development Reportoffers practical insights for policymakers business developers economic advisers researchers and professionals in the media and in non governmental organizations It is also an essential supplement to economic and development courses in both academic and professional settings **Social Sciences** Lawrence Boudon,Katherine D.

Indelible Inequalities in Latin America Luis Reygadas,Paul Gootenberg,2010-10-21 Building on Charles Tillys relational framework for understanding enduring inequalities scholars explore the processes that have combined to produce and reproduce inequalities in Latin America since the earliest days of European colonialism

Distribution and Development Gary S. Fields,2002-07-26 Most of the world s people live in developing economies as do most of the world s poor The predominant means of economic development is economic growth In this book Gary Fields asks to what extent and in what circumstances economic growth improves the material standard of living of a country s people Most development economists agree that economic growth raises the incomes of people in all parts of the income distribution and lowers the poverty rate At the same time some groups lose out because of changes accompanying economic growth Fields examines these beliefs asking what variables should be measured to determine whether progress is being made and what policies and circumstances cause some countries to do better than others He also shows how the same data can be interpreted to reach different even conflicting conclusions Using both theoretical and empirical approaches Fields defines and examines inequality poverty income mobility and economic well being Finally he considers various policies for broad based growth Copublished with the Russell Sage Foundation

Siren Song Carl J. Bauer,2010-09-30 Increasing scarcity conflict and environmental damage are critical features of the global water crisis As governments international organizations NGOs and corporations have tried to respond Chilean water law has seemed an attractive alternative to older legislative and regulatory approaches Boldly introduced in 1981 the Chilean model is the worlds leading example of a free market approach to water law water rights and water resource management Despite more than a decade of international debate however a comprehensive balanced account of the Chilean experience has been unavailable *Siren Song* is an interdisciplinary analysis combining law political economy and geography Carl Bauer places the Chilean model of water law in international context by reviewing the contemporary debate about water economics and policy reform He follows with an account of the Chilean experience drawing on primary and secondary sources in Spanish and English including interviews with key people in Chile He presents the debate about reforming the law after Chile s 1990 return to democratic government as well as emerging views about how water markets have worked in practice The resulting book provides insights about law economics and public policy within Chile and lessons for the countries around the world that are wrestling with the challenges of water policy reform
