previously been perceived as solely male domains While many female authors explored possibilities for the New Woman figure as the fin de siècle approached male authors began to consider how masculinities might respond to changing gender dynamics Authors such as Sir Arthur Conan Doyle and Bram Stoker amongst others addressed ways in which their male characters could negotiate a quandary of masculinities under threat by alterations to conventional gender spheres while remaining manly in situations which required a rethinking of many of their basic tenets during this time of flux This book examines the opinions of women within both the dominant and reverse discourses and parallels them with ideas surrounding changes in masculinities that began to emerge in male authored texts As such it details an often vociferous negotiation of volatile issues which led to a major upheaval of gender roles in the approach to a new century that demanded changes which were difficult to achieve
