**Achieving Global Food Security: The Caribbean Experience And Beyond** Mohamed Irfaan Ali, 2024-09-20 This book examines the current food security challenges in the small states with a focus on the Caribbean. The work is in the conjuncture of the Covid 19 pandemic and other global shocks including the disruption in the global supply chains and the increase in climate related events. These events have led to an increase in global prices including the price of food and fertilisers. This book starts by examining the global food security crisis considering the aftereffects of the shocks then provides a macro overview of the region by focusing on its ability to invest in agriculture. The results indicate that private sector investment in agriculture has experienced only a slight increase despite creeping inflation. This has exacerbated vulnerabilities in food security which deteriorated in 2020 undoing nearly a decade of progress in the face of climate change. Detailed attention is paid to food vulnerabilities in 14 Caribbean countries. In the final chapter a series of policy measures are outlined to strengthen the region's food security position with a particular focus on innovation and the region's comparative advantages.

Brouwer, Bruce A. McCarl, 2006-02-20 Interactions between agriculture climate and patterns of land use are complex Major changes in agriculture and land use patterns are foreseen in the next couple of decades in response to shifts in climate greenhouse gas management initiatives population growth and other forces The book explores key interactions between changes in agriculture patterns of land use and efforts to reduce greenhouse emissions from agriculture The volume is based on inter disciplinary science and policy interactions exploring the way land use may aid in addressing or be affected by the onset of climate change and alterations in food demand Future forces shaping land use decisions are examined and its sensitivity to climate change is highlighted Patterns of land use and the agricultural role in climate change mitigation are explored Also policy and social responses to the new perspectives on future land use patterns are identified The perspective of the book is beyond the year 2015      *ASEAN Beyond the Regional Crisis* Mya Than, 2001 As the regional financial and economic crisis has bottomed out and the ASEAN countries are on the recovery path this volume seeks to carry out a post mortem on the crisis to evaluate the sustainability of the recovery and the long term direction of the ASEAN economies It also examines the challenges and competitiveness of these economies which have become significant issues in the post recovery process Since it is not sufficient to address the economic and financial aspects the volume also looks at the human and social dimensions such as food security poverty and cross border pollution Furthermore in the wake of the regional crisis ASEAN has been criticized as being ineffective This has prompted a re examination of the relevance of the regional grouping in its present form evaluating ASEAN s performance challenges and opportunities and assessing whether there is a need for change      **People, Planet, and Progress Beyond 2015** , 2016-12-15 Second in the series of TERI s annual flagship publication on global sustainable development People Planet and Progress Beyond 2015 examines six critical issues of the Planet climate change ozone layer depletion loss of biodiversity desertification unsustainable use of natural resources and environmental pollution and six crucial issues of the People food security and safety health and well being education and learning sustainable habitat energy for all and social justice and equity reviews the Progress made by various regions and countries of the world on each of these issues and analyses the challenges and opportunities ahead particularly in the contexts of post 2015 global development agendas ushered by the Paris Climate Agreement UN Sustainable Development Goals and Sendai Framework for Disaster Risk Reduction The analysis is supported by primary data from authentic sources on a wide range of indicators that make the volume an invaluable resource material on contemporary discourses on global development      Beyond Sun and Sand Sherrie L. Baver, Barbara Deutsch Lynch, 2006-02-15 Filtered through the lens of the North American and European media the Caribbean appears to be a series of idyllic landscapes sanctuaries designed for sailing diving and basking in the sun on endless white sandy beaches Conservation literature paints a similarly enticing portrait describing the region as a habitat for endangered coral reefs and their denizens parrots butterflies turtles snails and a myriad of plant species In both versions the image of the exotic landscape overshadows the rich island cultures that are

both linguistically and politically diverse but trapped in a global economy that offers few options for development Popular depictions also overlook the reality that the region is fraught with environmental problems including water and air pollution solid waste mismanagement destruction of ecosystems deforestation and the transition from agriculture to ranching Bringing together ten essays by social scientists and activists *Beyond Sun and Sand* provides the most comprehensive exploration to date of the range of environmental issues facing the region and the social movements that have developed to deal with them The authors consider the role that global and regional political economies play in this process and provide valuable insight into Caribbean environmentalism Many of the essays by prominent Caribbean analysts are made available for the first time in English

Veenendaal, 2013-10-22 The reform of the Common Agricultural Policy CAP which is now being implemented reduces the support for a selected number of agricultural products This book uses welfare theory and applied general equilibrium analysis to assess the medium to long term consequences of this reform if the new policies remain in place until the beginning of the next century It analyses the implications of two alternative scenarios a a further trade liberalisation covering all commodities and b increased protectionism with high prices constraints on production and export subsidies financed by the farmers themselves The study also investigates the implications of financial renationalisation whereby the European Union member states would cover the costs of their own support measures

*Agricultural Markets Beyond Liberalization* Aad van Tilburg, Henk A.J. Moll, A. Kuyvenhoven, 2012-12-06 Agricultural markets have entered a long term process of liberalization with the aim of reducing imposed market imperfections such as monopolistic public trade entry barriers and subsidies The experience of more than a decade of agriculture liberalization offers a good opportunity to review and analyze the outcome of this process and to draw lessons for the future The central topic in *Agricultural Markets Beyond Liberalization* is the relationship between market structure and how markets perform in a dynamic context during a liberalization process The topic is studied from both a micro and macro viewpoint and refers to different types of agricultural markets This volume brings together the dynamics of agricultural markets in several parts of the world with a special focus on transition economics and Africa The different studies cover geographical areas as wide as a district as well as a group of countries and institutions from individual contracts to multi national organizations The analysis of liberalization under different circumstances and the different methods of analysis used by the authors provide a valuable foundation for the assessment of liberalization
