Beyond the Anarchical Society Edward Keene,2002-07-11 Edward Keene argues that the conventional idea of an anarchical society of equal and independent sovereign states is an inadequate description of order in modern world politics International political and legal order has always been dedicated to two distinct goals to try to promote the toleration of different ways of life while advocating the adoption of one specific way that it labels civilization The nineteenth century solution to this contradiction was to restrict the promotion of civilization to the world beyond Europe That discriminatory way of thinking has now broken down with the result that a single global order is supposed to apply to everyone but opinion is still very much divided as to what the ultimate purpose of this global order should be and how its political and legal structure should be organised

Beyond Education Eli Meyerhoff, 2019-07-23 A bold call to deromanticize education and reframe universities as terrains of struggle between alternative modes of studying and world making Higher education is at an impasse Black Lives Matter and MeToo show that racism and sexism remain pervasive on campus while student and faculty movements fight to reverse increased tuition student debt corporatization and adjunctification Commentators typically frame these issues as crises for an otherwise optimal mode of intellectual and professional development In *Beyond Education* Eli Meyerhoff instead sees this impasse as inherent to universities as sites of intersecting political struggles over resources for studying Meyerhoff argues that the predominant mode of study education is only one among many alternatives and that it must be deromanticized in order to recognize it as a colonial capitalist institution He traces how key elements of education the vertical trajectory of individualized development its role in preparing people to participate in governance through a pedagogical mode of accounting and dichotomous figures of educational waste the dropout and value the graduate emerged from histories of struggles in opposition to alternative modes of study bound up with different modes of world making Through interviews with participants in contemporary university struggles and embedded research with an anarchist free university *Beyond Education* paves new avenues for achieving the aims of an alter university movement to put novel modes of study into practice Taking inspiration from Black Lives Matter Occupy Wall Street and Indigenous resurgence projects it charts a new course for movements within against and beyond the university as we know it

Reading Territory Kathryn Walkiewicz, 2023-03-09 The formation of new states was an essential feature of US expansion throughout the long nineteenth century and debates over statehood and states rights were waged not only in legislative assemblies but also in newspapers maps land surveys and other forms of print and visual culture Assessing these texts and archives Kathryn Walkiewicz

theorizes the logics of federalism and states rights in the production of US empire revealing how they were used to imagine states into existence while clashing with relational forms of territoriality asserted by Indigenous and Black people Walkiewicz centers her analysis on statehood movements to create the places now called Georgia Florida Kansas Cuba and Oklahoma In each case she shows that Indigenous dispossession and anti Blackness scaffolded the settler colonial project of establishing states rights But dissent and contestation by Indigenous and Black people imagined alternative paths even as their exclusion and removal reshaped and renamed territory By recovering this tension Walkiewicz argues we more fully understand the role of state centered discourse as an expression of settler colonialism We also come to see the possibilities for a territorial ethic that insists on thinking beyond the boundaries of the state
