Beyond The Washington Consensus Institutions Matter Latin America And Caribbean Studies:

Beyond the Washington Consensus Shahid Javed Burki,Guillermo Perry,1998-01-01 This report examines the precise nature of the required institutional reforms needed to achieve higher sustained rates of growth and to make a dent in poverty reduction and provides a framework for their design and implementation The more modest objective is to examine how the concepts of the new institutional economics are useful for analyzing and designing institutions and to evaluate how political economy concepts can be used to develop strategies for implementing institutional reforms Employing some of these concepts the report demonstrates that sound institutional reform can be technically and politically viable in the following key sectors banking capital markets and legal institutions educational institutions judicial reforms and public administration

Beyond the Washington Consensus Shahid Javed Burki,Guillermo Perry,1998 **Chile** Guillermo Perry,Danny M. Leipziger,1999-01-01 The Chilean model has been expostulated for some time in the Latin American and Caribbean region and elsewhere because it appeared that the country despite terrible political and economic turmoil embodied important lessons about economic management Over the last 15 years Chile has been the Latin American country with the most consistent and successful economic record The success of Chile s economic reforms and the subsequent dramatic increase in real income are well known To a large extent Chile s positive fiscal outcomes have been the result of sound policies as well as sound fiscal institutions However there is room for improvement in the education and health sectors and the results for Chile in terms of equality of income are not positive Chile Recent Policy Lessons and Emerging Challenges presents a series of papers analyzing different aspects of Chilean public policy which cover economic and social policies as well as regulatory and governance issues The book is broken down into three parts The first part examines the contribution of macroeconomic policies to superior outcomes the second part analyzes the many advances in the social sector and the remaining troublesome issues and the third part evaluates regulatory reforms and the effects of privatization Since no public policy model is static further reforms are needed to maintain Chile s economic growth as well as to respond effectively to public demands As Chile grapples with its pockets of poverty the balance between social safety nets and the need for greater efficiency in labor markets a rebalancing of regulatory powers and other thorny issues it will need to rely on its institutional experience in public policy and conflict resolution Vanishing Growth in Latin America Andrés Solimano,2006-01-01 Economic growth in Latin America and the rise of material welfare has lagged behind that of more dynamic areas of the world economy In a region prone to policy experiments the policies of the Washington Consensus applied since the 1990s failed to bring sustained growth to most of Latin America Andres Solimano and an impressive set of contributors analyze the last 40 years in order to determine the role of economic reforms external conditions factor accumulation income inequality political instability and productivity in explaining GDP increases The book also looks at cycles of growth identifying periods of rapid growth and contrasting them with periods of stagnation and collapse **The Challenge of Economic Development**

Norman L. Hicks, 2011 This book provides a general overview of the challenges of economic development for the five billion people living in developing countries While they constitute over 80 percent of the world's population they account for only 40% of the world's output and are home to 2.6 billion people living on less than 2.00 per day Thinking on economic development has shifted over time Early theories that stressed capital formation and a heavy reliance on the public sector proved inadequate Gradually economists began to see that development was a complex multifaceted problem that combined economic issues with problems of poverty and income distribution institution building and governance While there have been many failures there have also been many successes Countries such as China Chile Ghana and Korea demonstrate that good policies and strong institutions can result in remarkable progress However many poor countries particularly those in Africa continue to lag behind Closing this gap remains a major challenge for the world particularly as the growing population and output of developing countries accelerate tensions in such areas as trade immigration and financial flows

European Review of Latin American and Caribbean Studies, 2004 *Digital Dragon* Adam Segal, 2011-02-23 During the economic reforms of the last twenty years China adopted a wide array of policies designed to raise its technological capability and foster industrial growth Ideologically the government would not promote private ownership firms and instead created a hybrid concept that of nongovernmental enterprises or minying qiye Adam Segal examines the minying experience particularly in high technology in four key regions Beijing Shanghai Xi'an and Guangzhou Minying enterprises have been neither clear successes nor abject failures Segal finds Instead outcomes varied though efforts to create a core of innovative high tech firms succeeded in Beijing minying enterprises elsewhere have languished He points to variations in local implementation of government policies on investment property rights regulation and government supervision as a key to the different outcomes He explains these peculiarities of implementation by putting official decisions within their local contexts Extending his analysis he compares the experience of creating technology enterprises in China with those of Korea the chaebol system and Taiwan enterprise groups Based on interviews with entrepreneurs and local government officials as well as numerous published primary sources *Digital Dragon* is the first detailed look at a major Chinese institutional experiment and at high tech endeavors in China Can China become a true global economic power The evolution of the high technologies sector will determine Segal says whether China will become a modern economy or simply a large one

Determinants of Crime Rates in Latin America and the World Pablo Fajnzylber, Daniel Lederman, Norman Loayza, 1998-01-01 A growing concern in most regions of the world is the heightened incidence of criminal and violent behavior especially in the Latin American and Caribbean Region This study uses a new data set of crime rates for a large sample of countries to analyze the determinants of national homicide and robbery rates The authors describe a simple model of incentives to commit crimes by estimating several econometric models and utilizing empirical models to draw their conclusions

Beyond Common Knowledge Erik Gilbert Jensen, Thomas C. Heller, 2003 An intensive global search is on for the rule of law the holy grail of

good governance which has led to a dramatic increase in judicial reform activities in developing countries Very little attention however has been paid to the widening gap between theory and practice or to the ongoing disconnect between stated project goals and actual funded activities Beyond Common Knowledge examines the standard methods of legal and judicial reform Taking stock of international experience in legal and judicial reform in Latin America Europe India and China this volume answers key questions in the judicial reform debate What are the common assumptions about the role of the courts in improving economic growth and democratic politics Do we expect too much from the formal legal system Is investing in judicial reform projects a good strategy for getting at the problems of governance that beset many developing countries If not what are we missing Poverty and Social Developments in Peru, 1994-1997 ,1999 Where when and how much to invest in wastewater treatment is a policy decision that presents many challenges and is not properly addressed in most situations worldwide The most common situations are unfortunately those in which no treatment is provided at all The integration of wastewater management and pollution control interventions and policies within the broader water resources management policy are essential for achieving the efficient use of the scarce resource available With that in mind this paper has three objectives Emphasize the need for systematic evaluation of wastewater management actions and investments as part of any water resources management initiative Define the conceptual framework that should guide the analysis process Identify and explore techniques appropriate to this analysis The ultimate purpose of the paper is to provide a general approach to developing and implementing wastewater management interventions Its scope is determined by two main considerations i the need to incorporate the general principles that determine water resources management policies into the design and selection of wastewater management and pollution control interventions and ii the need to address water quality problems at the appropriate geographical scale **Growth Challenges and Government Policies in Armenia** Lev M. Freinkman,2002-01-01 Este informe revisa las tendencias del crecimiento en Armenia para el periodo 1994 2000 presenta debilidades importantes de los patrones existentes del desarrollo y sugiere el diseno de politicas para acelerar la reestructuracion de empresas atraer la inversion y promover la creacion de nuevos negocios en corto plazo **The New Institutional Economic History of Douglass C. North** Matthijs Krul,2018-08-28 This book offers a comprehensive assessment of Douglass North s contribution to economics and the social sciences by examining the origins and structure of his New Institutional Economic History NIEH Informed by contemporary debates in the philosophy of economics Krul describes the evolution of North s theory from mainstream economics to an increasingly heterodox form of New Institutionalism He also examines what North s original aims were in developing the NIEH research programme and how well it has achieved these aims By exploring major themes in North s NIEH with an emphasis on the final stage of his theory Krul sheds new light on the strengths and weaknesses of North s work He also discusses the implications of this critical interpretation for the New Institutionalism in economics and other fields of social science Growth, Employment, and

Equity Barbara Stallings, Wilson Peres, 2010-12-01 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication In the last ten to fifteen years the Latin American and Caribbean region has undergone the most significant transformation of economic policy since World War II Through a series of structural reforms an increasing number of countries have moved from closed state dominated economies to ones that are more market oriented and open to the rest of the world Policymakers expected that these changes in conjunction with lower rates of inflation and increased spending in the social area would speed up economic growth increase productivity and lead to the creation of more jobs and greater equality Have those expectations been fulfilled Analyzing the impact of the reforms in nine countries Argentina Bolivia Brazil Chile Colombia Costa Rica Jamaica Mexico Peru this study provides a detailed picture of progress to date At the overall regional level the book suggests the reforms have had a surprisingly small impact a small positive impact on investment and growth and a small negative impact on employment and income distribution But at the country sectoral and microeconomic levels it finds evidence of strong effects with some units doing very well and others falling behind The

Politics of Uneven Development Richard F. Doner, 2009-02-09 Why do some middle income countries diversify their economies but fail to upgrade to produce world class products based on local inputs and technological capacities Why have the little tigers of Southeast Asia such as Thailand continued to lag behind the Newly Industrializing Countries of East Asia Richard Doner goes beyond political will by emphasizing institutional capacities and political pressures development challenges vary upgrading poses tough challenges that require robust institutional capacities Such strengths are political in origin They reflect pressures such as security threats and resource constraints which motivate political leaders to focus on efficiency more than clientelist payoffs Such pressures help to explain the political institutions veto players through which leaders operate Doner assesses this argument by analyzing Thai development historically in three sectors sugar textiles and autos and in comparison with both weaker and stronger competitors Philippines Indonesia Taiwan Brazil and South Korea

Finance for Development Barbara Stallings, 2006-03-08 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Access to finance is critical in setting the course for development in emerging market economies In this innovative study which provides the first book length analysis of the Latin American financial sector Barbara Stallings and Rogerio Studart examine the dramatic changes resulting from financial liberalization in the region The authors begin by discussing the critical transformations taking place in Latin America since 1990 a period marked by acceleration toward a new open market oriented development model and away from a semi closed model relying heavily on the state Stallings and Studart examine changes in ownership of the financial sector and government regulation of banking evaluate the role of capital markets as a source of finance and compare Latin America's financial sector to that of East Asia The second section of the book features case studies that demonstrate the changes occurring in Chile Mexico and Brazil with particular reference to finance for investment and access to credit The authors conclude with a set of policy

recommendations aimed at strengthening Latin American banks and capital markets so that they can play a greater role in supporting economic development **The Tools of Government** Odus V. Elliott, 2002-02-22 The new tools of public action have come to rely heavily on third parties private businesses nonprofit organisations and other levels of government for their operation The Tools of Government is a comprehensive guide to the operation of these tools and to the management accountability policy and theoretical issues they pose *Diagnosis Corruption* Rafael Di Tella, William D. Savedoff, 2001

Changing Perceptions and Altered Reality ,2000 There was the economic development miracle in the East Asia Region then the great crash In the Latin American and Caribbean region there remain question marks little increased growth and no miracle in sight Given the opportunity to observe both of these regions first hand over a 25 year period Shahid Javed Burki relates his observations perceptions and comparisons of these diverse emerging economies As he departs the World Bank Mr Burki leaves this contribution to the store of Bank knowledge for future reference It is both a professional and personal narrative of two dynamic regions undergoing tremendous change Mr Burki shares his unique insight into these economies and his own changing perceptions during his work in the Latin American and Caribbean region *Measuring Governance, Corruption, and State Capture* ,2000 In a new approach to measuring typically subjective variables BEEPS the 1999 Business Environment and Enterprise Performance Survey the transition economies component of the World Business Environment Survey quantitatively assesses governance from the perspective of about 3 000 firms in 20 countries Unbundling the measurement of governance and corruption empirically suggests the importance of grand corruption in some countries manifested in state capture by the corporate sector through the purchase of decrees and legislation and by graft in procurement *The Oxford Handbook of Latin American Economics* José Antonio Ocampo, Jaime Ros, 2011-07-28 A comprehensive overview of the key factors affecting the development of Latin American economies that examines long term growth performance macroeconomic issues Latin American economies in the global context technological and agricultural policies and the evolution of labour markets the education sector and social security programmes
