

The background of the cover is a photograph of an archaeological excavation site. Two people are kneeling on the ground, working on a small object. A large, circular, shallow pit has been dug into the earth. The scene is dimly lit, with a strong light source from the upper left creating a bright glow on the ground and the people's hands. The overall tone is dark and focused on the archaeological work.

## **Archaeology In Practice A Student Guide To Archaeological Analyses:**

**Archaeology in Practice** Jane Balme, Alistair Paterson, 2009-02-09 Archaeology in Practice A Student Guide to Archaeological Analyses offers students in archaeology laboratory courses a detailed and invaluable how to manual of archaeological methods and provides insight into the breadth of modern archaeology. Written by specialists of material analyses whose expertise represents a broad geographic range. Includes numerous examples of applications of archaeological techniques. Organized by material types such as animal bones, ceramics, stone artifacts and documentary sources or by themes such as dating, ethics and report writing. Written accessibly and amply referenced to provide readers with a guide to further resources on techniques and their applications. Enlivened by a range of boxed case studies throughout the main text.

**Bridging the Divide** Caroline Phillips, Harry Allen, 2016-09-16 The collected essays in this volume address contemporary issues regarding the relationship between Indigenous groups and archaeologists including the challenges of dialogue, colonialism, the difficulties of working within legislative and institutional frameworks and NAGPRA and similar legislation. The disciplines of archaeology and cultural heritage management are international in scope and many countries continue to experience the impact of colonialism. In response to these common experiences, both archaeology and indigenous political movements involve international networks through which information quickly moves around the globe. This volume reflects these dynamic dialectics between the past and the present and between the international and the local, demonstrating that archaeology is a historical science always linked to contemporary cultural concerns.

*Remote Sensing and Geosciences for Archaeology* Deodato Tapete, 2018-04-27 This book is a printed edition of the Special Issue Remote Sensing and Geosciences for Archaeology that was published in Geosciences.

Holocaust Archaeologies Caroline Sturdy Colls, 2015-02-28 Holocaust Archaeologies Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political, social, ethical and religious issues that surround investigations of this period and by considering how to address them. It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested. It presents an interdisciplinary methodology in order to demonstrate how archaeology can uniquely contribute to the history of this period. Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed. This book challenges many of the widely held perceptions concerning the Holocaust, including the idea that it was solely an Eastern European phenomenon centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well known. The typologically, temporally and spatially diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed. Finally, the volume concludes by discussing issues relating to the representation of the Holocaust and the impact of this on commemoration, heritage management and education. This discussion is a timely one as

we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence

**Excavating the Land of Jesus** James Riley Strange, 2023-06-20 How do archaeologists unearth the daily life of people from Jesus's time Contrary to popular belief archaeology of first century Roman Galilee is not about illustrating or proving the Gospels drawing timelines or hunting treasure Rather it is about understanding the lives of people just like us who lived in the time of Jesus How do we understand Jesus and his mission as part of a larger world How do we interpret material culture alongside textual evidence from the Gospels How do we know where and how to dig James Riley Strange teaches students how to address these problems in this essential textbook Drawing on professional experience as a scientific archaeologist in Israel Strange explains current methodology for ground surveying excavating evidence and interpreting data Excavating the Land of Jesus is the ideal guide for students seeking answers in the dirt of the Holy Land

Archaeology provides a firm grounding for anyone interested in learning more about the discipline. Throughout the book, key information is accessibly presented and important questions are answered, including: What is archaeology? How did archaeology begin? How can archaeology tell us about the past? How can archaeology tell how people use space and the landscape? How can we use the past to understand people? How do archaeology and heritage interact? What role does archaeology play in society today? How do we practice archaeology? Drawing on the experiences of practising archaeologists with engaging examples and studies from sites around the world, this book gives the reader a sense of what it is to study archaeology and be an archaeologist. An essential text for students studying A Level archaeology, those considering or beginning a degree foundation degree in archaeology, and those of all ages interested in volunteering or becoming involved in archaeological projects.

**Coastal Karst Landforms** Michael J. Lace, John E. Mylroie, 2013-06-28. Carbonate rock coasts are found world wide from continental shorelines of the Adriatic Sea of Europe to the Yucatan Peninsula of North America and on tropical islands from Rodrigues Island in the Indian Ocean to the Mariana Islands in the Pacific Ocean to the Bahama Islands in the Atlantic Ocean. Such coasts are well known for their unusual and distinctive karst landforms. Karst processes, particularly those associated with coastal landforms, are proving to be surprisingly unique and complex. This volume presents a comprehensive overview of the processes associated with coastal karst development, comparing examples from a broad geographical and geomorphological range of island and continental shoreline, paleoshoreline settings, including a review of pseudokarst processes that can compete with and overprint dynamic coastal karst landscapes. As effective management of hydrologic resources grows more complex, coastal caves and karst represent fundamental components in associated coastal aquifers which, in the rock record, can also form significant petroleum reservoirs. Audience: By providing a clearer understanding of the geological, biological, archaeological, and cultural value of coastal caves and karst resources, this volume offers a critical tool to coastal researchers and geoscientists in related fields and to coastal land managers as it illustrates the diversity of coastal karst landforms, the unique processes which formed them, the diversity of resources they harbor, and their relationship to coastal zone preservation strategies and the development of sustainable management approaches.

**Deep History** Ann McGrath, Jackie Huggins, 2025-07-01. What is deep history? How do histories make sovereignty on Country? What is history's future? For Aboriginal people, the past is the present. Competing histories form and transform the lands, peoples, and nations of Oceania, from the Pacific Islands, New Guinea, and Aotearoa New Zealand to Australia. In nations impacted by colonialism, such questions are particularly pertinent. First Nations peoples have long made history living on their Country far longer than the colonial invaders. In *Deep History: Country and Sovereignty*, edited by Ann McGrath and Jackie Huggins, leading historians and thinkers explore Indigenous histories of caring for places and people over millennia. With contributions from Brenda L. Croft, Anna Clark, Lynette Russell, and many more, *Deep History* considers how stories of the past and the future are inscribed on land, waterways, and skies. Walking on Country, gardening, and agriculture, and rock art are historical.

Dissatisfaction has matured in Africa and elsewhere around the fact that often the dominant frameworks for interpreting the continent's past are not rooted on the continent's value system and philosophy This creates knowledge that does not make sense especially to local communities The big question therefore is can Africans develop theories that can contribute towards the interpretation of the African past using their own experiences Framed within a concept revision substrate the collection of papers in this thought provoking volume argues for concept revision as a step towards decolonizing knowledge in the post colony The various papers powerfully expose that cleansed knowledge is not only locally relevant it is also locally accessible and globally understandable
