Jungian and Interdisciplinary Analyses of Emotions

Elizabeth Brodersen, Isabelle Meier, Valeria Céspedes Musso, 2025-04-09 This comprehensive collection of chapters concentrates on the multifaceted theme of emotions and deepens our understanding of the role emotions play within the psyche. Leading international psychoanalysts and academics offer broad interdisciplinary dimensions using their own unique perspectives on the topic of emotions. Delineating into five parts this volume focuses on key themes such as emotions, imagination and method, the emotional basis of archetypes and complexes, relational trauma, mapping contagion across cultures, the contribution from neuroscience and finally dreams and the transcendent. Clinical cases presented underline the important role unconscious disassociated emotions play in the formation of symptomatology and how wholeness is facilitated through their acceptance. This collection offers a timely contribution to the interdisciplinary study of emotions, placing Jungian psychology firmly within that framework. Traversing a range of pertinent themes including archetypal defences, primary narcissistic wounding, somatic symptoms, symbolic representation and processing, transference and types of memory, the book features a variety of voices from different theoretical perspectives, with each contributor offering clinical examples and lessons from their experiences working with patients. Chapters cover a wide range of clinical phenomena including early relational trauma, dissociative states, the Self-care System, unconscious communication, embodied countertransference, eroticization, PTSD, creativity and cultural social issues. *The Complexity of Trauma* is key reading for psychoanalysts and therapists as well as for researchers, students and trainees in schools of psychodynamic psychotherapy and those interested in working with trauma.
