Architecture After Modernism:

Architecture After Modernism Diane Yvonne Ghirardo, 1996 Since the Modern Movement began to be challenged in the late 1960s architecture has followed a number of widely divergent paths In this thoughtful and eloquent book Diane Ghirardo examines the architectural world of the last quarter century and its theories in the crucial context of social and political issues Within a survey of a broad range of buildings she focuses on specific megaprojects as paradigms for discussion In the realm of public space she argues the key questions are raised by the Disney empire and its amusement parks in domestic space by the IBA in Berlin with projects ranging from new structures to rehabilitation and residents self build When it comes to reconfiguring the urban sphere the megaproject is London s Docklands the most ambitious and politically sensitive development in postwar Britain Her text ranges world wide and she considers the work of lesser known designers and women architects as well as famous international stars

The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects

Southern Vietnamese Modernist Architecture Mel Schenck, 2020-04-21 Southern Vietnamese Modernist Architecture features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid century modernist architecture that is extraordinary in the world Especially for

Americans Vietnam has been a war instead of a country The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of colonial architecture In the mid twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world Most importantly the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971-72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence and the value of modernist architecture in living in the world today **American Architectural History** Keith

Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Julie Snow Architects Julie Snow, Julie Snow Architects, 2005-04-07 It's an unfortunate reality that architects practicing in the great expanse between the East and West coasts all too often find themselves beyond the radar of the profession's so-called tastemakers And it's especially a shame in the case of Julie Snow a Minneapolis based architect who has over the past decade developed one of the most inventive practices anywhere in the United States Snow's meticulously constructed work has the structural opacity and formal integrity that characterized Mies van der Rohe's architecture but with a sense of humanity and a sensitivity to the environment that seems borrowed from her Midwestern progenitor Frank Lloyd Wright This the first monograph on Snow's work provides in depth documentation of 14 of her residential institutional corporate and public projects including the Koehler Residence in New Brunswick Canada a series of Minneapolis Light Rail Stations the Minnesota Children's Museum and the University of South Dakota School of Business Julie Snow Architect is produced in collaboration with award winning designer Andrew Blauvelt and features an introductory essay by Jan Abrams director of the Minnesota Design Institute
