Architecture and Science-fiction Film David Terrance Fortin, 2011 The enduring paradoxes of the home are often brought to light in science fiction SF writing and film However while crossovers between architecture and SF have proliferated the home is often overshadowed by the spectacle of otherness By examining the home from the estranging perspective of SF and in particular the films based on Phillip K Dick's books this work offers a unique critical analysis with particular relevance for contemporary architecture

Contributors examine our fascination with the city through the history of art and architecture, urban studies, environmental studies, cultural geography, and screen studies. Bringing together a wide spectrum of urban contexts, *Visualizing the City*'s diverse essays explore visual representations of urbanism and modernity reflected through the prism of global cultures using an engaging variety of methods and texts.

Film, Architecture and Spatial Imagination Renée Tobe, 2016-08-25. Films use architecture as visual shorthand to tell viewers everything they need to know about the characters in a short amount of time. Illustrated by a diverse range of films from different eras and cultures, this book investigates the reciprocity between film and architecture. Using a phenomenological approach, it describes how we, the viewers, can learn how to read architecture and design in film in order to see the many inherent messages. Architecture's representational capacity contributes to the plausibility or reality possible in film. The book provides an ontological understanding that clarifies and stabilizes the reciprocity of the actual world and a filmic world of illusion and human imagination, thereby shedding light on both film and architecture.

Consuming Architecture Daniel Maudlin, Marcel Vellinga, 2014-03-05. Projecting forward in time from the processes of design and construction that are so often the focus of architectural discourse, *Consuming Architecture* examines the variety of ways in which buildings are consumed after they have been produced, focusing in particular on processes of occupation, appropriation, and interpretation. Drawing on contributions by architects, historians, anthropologists, literary critics, artists, film makers, photographers, and journalists, it shows how the consumption of architecture is a dynamic and creative act that involves the creation and negotiation of meanings and values by different stakeholders and that can be expressed in different voices. In so doing, it challenges ideas of what constitutes architecture, architectural discourse, and architectural education, how we understand and think about it, and who can claim ownership of it. *Consuming Architecture* is aimed at students in architectural education and will also be of interest to students and researchers from disciplines that deal with architecture in terms of consumption and material culture.

Cine-scapes Richard Koeck, 2013. *Cine-scapes* ignites new ways of seeing, thinking, and debating the nature of architecture and urban spaces. Drawing on the author's extensive knowledge, it offers insight into architecture and urban debates through the eyes of a practitioner working in the fields of film and architectural design, emphasizing how filmic, cinematic tendencies take place or find their way into urban practices. It can be used as a tool for educators, students, and practitioners in architecture and urban design to communicate and discuss design issues with regard to contemporary
