directly after the living model and was often used to advertise the claim of an image to be a faithful likeness or a bearer of reliable information Viewed as an assertion of accuracy or truth *ad vivum* raises a number of fundamental questions in the area of early modern epistemology questions about the value and prestige of visual and or physical contiguity between image and original about the kinds of information which were thought important and dependably transmissible in material form and about the roles of the artist in that transmission The recent interest of historians of early modern art in how value and meaning are produced and reproduced by visual materials which do not conform to the definition of art as unique invention and of historians of science and of art in the visualisation of knowledge has placed the questions surrounding *ad vivum* at the centre of their common concerns Contributors Thomas Balfe Jos Beltr n Carla Benzan Eleanor Chan Robert Felfe Mechthild Fend Sachiko Kusukawa Pieter Martens Richard Mulholland Noa Turel Joanna Woodall and Daan Van Heesch **Pearls for the Crown** Mónica Domínguez Torres, 2024-03-01 In the age of European expansion pearls became potent symbols of imperial supremacy *Pearls for the Crown* demonstrates how European art legitimated racialized hierarchies and inequitable notions about humanity and nature that still hold sway today When Christopher Columbus encountered pristine pearl beds in southern Caribbean waters in 1498 he procured the first source of New World wealth for the Spanish Crown but he also established an alternative path to an industry that had remained outside European control for centuries Centering her study on a selection of key artworks tied to the pearl industry Mónica Domínguez Torres examines the interplay of materiality labor race and power that drove artistic production in the early modern period Spanish colonizers exploited the expertise and forced labor of Native American and African workers to establish pearling centers along the coasts of South and Central America disrupting the environmental and demographic dynamics of their overseas territories Drawing from postcolonial theory material culture studies and ecocriticism Domínguez Torres demonstrates how through use of the pearl European courtly art articulated ideas about imperial expansion European superiority and control over nature all of which played key roles in the political circles surrounding the Spanish Crown This highly anticipated interdisciplinary study will be welcomed by scholars of art history the history of colonial Latin America and ecocriticism in the context of the Spanish colonies Otto Marseus van Schrieck (c. 1620-1678) and the Lepidochromy Technique V.E. Picturing the Book of Nature Sachiko Kusukawa, 2012-05-02 Because of their spectacular naturalistic pictures of plants and the human body Leonhart Fuchs's *De historia stirpium* and Andreas Vesalius's *De humani corporis fabrica* are landmark publications in the history of the printed book But as *Picturing the Book of Nature* makes clear they do more than bear witness to the development of book publishing during the Renaissance and to the prominence attained by the fields of medical botany and anatomy in European medicine Sachiko Kusukawa examines these texts as well as Conrad Gessner's unpublished *Historia plantarum* and demonstrates how their illustrations were integral to the emergence of a new type of argument during this period a visual argument for the scientific study of nature To set the stage Kusukawa begins with a survey of the technical financial artistic and political conditions that governed the production of printed books during the Renaissance It was during the first half of the sixteenth century that learned authors began using images in their research and writing but because the technology was so new there was a great deal of variety of thought and often disagreement about exactly what images could do how they should be used what degree of authority should be attributed to them which graphic elements were bearers of that authority and what sorts of truths images could and did encode Kusukawa investigates the works of Fuchs Gessner and Vesalius in light of these debates scrutinizing the scientists treatment of illustrations and tracing their motivation for including them in their works What results is a fascinating and original study of the visual dimension of scientific knowledge in the sixteenth century
