**Beyond the Big Ditch** Ashley Carse, 2014-10-31 A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal In this innovative book Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms forests cities and rural communities Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region Each passing ship drains 52 million gallons out to sea a volume comparable to the daily water use of half a million Panamanians Infrastructures like the Panama Canal Carse argues do not simply conquer nature they rework ecologies in ways that serve specific political and economic priorities Interweaving histories that range from the depopulation of the U S Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route 2014 marks the 100th anniversary of the Panama Canal Beyond the Big Ditch calls us to consider how infrastructures are materially embedded in place producing environments with winners and losers

**Has It Come to This?** J.P. Sapinski, Holly Jean Buck, Andreas Malm, 2020-11-13 Geoengineering is the deliberate and large scale intervention in the Earth's climate system in an attempt to mitigate the adverse effects of global warming Now that a climate emergency is upon us claims that geoengineering is inevitable are rapidly proliferating How did we get into this What options make it onto the table Which are left out Whom does geoengineering serve These are some of the questions that the thinkers contributing to this volume are exploring

*A Guide to Spatial History* Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research

*Erased* Marixa Lasso, 2019-02-25 The Panama Canal's untold history from the Panamanian point of view Sleuth and scholar Marixa Lasso

recounts how the canal's American builders displaced 40 000 residents and erased entire towns in the guise of bringing modernity to the tropics The Panama Canal set a new course for the modern development of Central America Cutting a convenient path from the Atlantic to the Pacific oceans it hastened the currents of trade and migration that were already reshaping the Western hemisphere Yet the waterway was built at considerable cost to a way of life that had characterized the region for centuries In *Erased* Marixa Lasso recovers the history of the Panamanian cities and towns that once formed the backbone of the republic Drawing on vast and previously untapped archival sources and personal recollections Lasso describes the canal's displacement of peasants homeowners and shop owners and chronicles the destruction of a centuries old commercial culture and environment On completion of the canal the United States engineered a tropical idyll to replace the lost cities and towns a space miraculously cleansed of poverty unemployment and people which served as a convenient backdrop to the manicured suburbs built exclusively for Americans By restoring the sounds sights and stories of a world wiped clean by U S commerce and political ambition Lasso compellingly pushes back against a triumphalist narrative that erases the contribution of Latin America to its own history

**Earth Shapers** Maxim Samson, 2025-08-07 A riposte to the idea that geography is destiny FINANCIAL TIMES Samson demonstrates how we are not always prisoners of geography but increasingly its masters LEWIS DARTNELL This is a book that reshapes our story of global human geography DANNY DORLING Accessible and erudite this is an original look at the geography of connection LEWIS BASTON Mountains meridians rivers and borders these are some of the features that carve up the world on our maps and in our minds But geography is far less set in stone than we might believe and over time we have become experts at reshaping our surroundings From the Qhapaq an South America's Great Road and the Panama Canal to Mozambique's railways and Korea's sacred Baekdu daegan mountain range Samson explores how we mould the world around us And how as we etch our needs onto the natural landscape we alter the course of history An immense work of cultural geography touching on ecology sociology history and politics *Earth Shapers* argues that far from being constrained by geography we are instead its creators
