Alchemists of Human Nature Petteri Pietikainen,2015-10-06 A study of Modernist utopias of the mind This book examines the psychodynamic writings of Otto Gross C G Jung Wilhelm Reich and Erich Fromm It argues utopianism became increasingly important to the fundamental ambitions of all four thinkers and places the utopian impulse with the historical context of the early twentieth century *Burning All Illusions* David Edwards,1996 This is a book about freedom Above all about the idea that there is often no greater obstacle to freedom than the assumption that it has already been attained What prison after all could be more secure than that deemed to be the world where boundaries of action and thought are assumed to define not the limits of the permissible but the limits of the possible In the past we have been prisoners of tyrants and dictators and consequently have needed to win our freedom in very concrete physical terms We now need to free ourselves not from a slave ship or a concentration camp but from many of the illusions fostered in our democratic society A wise and acute analysis of the way our minds are controlled not in a totalitarian state but in a democratic one Edwards also suggests how we can escape this control in a self help book which unlike other books of this genre connects our inner world of alienation with the world outside Howard Zinn A treatise on what freedom truly means *Burning All Illusions* is an important philosophical and psychology text that should be on every political science curriculum reading list Wisconsin Book Watch

**The Masterless** Wilfred M. McClay, 2000-11-09 In this provocative book Wilfred McClay considers the long standing tension between individualism and social cohesion in conceptions of American culture Exploring ideas of unity and diversity as they have evolved since the Civil War he illuminates the historical background to our ongoing search for social connectedness and sources of authority in a society increasingly dominated by the premises of individualism McClay borrows D H Lawrence's term masterless men extending its meaning to women as well and argues that it is expressive of both the promise and the peril inherent in the modern American social order Drawing upon a wide range of disciplines including literature sociology political science philosophy psychology and feminist theory McClay identifies a competition between visions of dispersion on the one hand and coalescence on the other as modes of social organization In addition he employs intellectual biography to illuminate the intersection of these ideas with the personal experiences of the thinkers articulating them and shows how these shifting visions are manifestations of a more general ambivalence about the process of national

integration and centralization that has characterized modern American economic political and cultural life
