Woods, 2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium's power to depict how the past jostled the present In *Beyond the Architect's Eye* Mary N Woods expands on this range of images through a rich analysis that commingles art amateur and documentary photography genres usually not considered architectural but that often take the built environment as their subject Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II when urban and rural areas grew further apart in the face of skyscrapers massive industrialization and profound cultural shifts Central to this study is the work of Alfred Stieglitz Frances Benjamin Johnston and Marion Post Wolcott but Woods weaves a wider narrative that also includes Alice Austen Gertrude Kasebier Berenice Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old South crystallized in photographs like Johnston's a New South shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach *Beyond the Architect's Eye* is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography **BEYOND THE CANVAS** DR. **Islamic Art and Beyond** Oleg Grabar, 2024-08-01 *Islamic Art and Beyond* is the third in a set of four volumes of studies on Islamic art by Oleg Grabar Between them they bring together more than eighty articles studies and essays work spanning half a century by a master of the field Each volume takes a particular section of the topic the three other volumes being entitled *Early Islamic Art 650-1100* *Islamic Visual Culture 1100-1800* and *Jerusalem* Reflecting the many incidents of a long academic life they illustrate one scholar's attempt at making order and sense of 1400 years of artistic growth They deal with architecture painting objects iconography theories of art aesthetics and ornament and they seek to integrate our knowledge of Islamic art with Islamic culture and history as well as with the global concerns of the History of Art In addition to the articles selected each volume contains an introduction which describes often in highly personal ways the context in which Grabar's scholarship developed and the people who directed and mentored his efforts The articles in the present volume illustrate how the author's study of Islamic art led him in two directions for a further understanding of the arts One is how to define Islamic art and what impulses provided it with its own peculiar forms and dynamics of growth Was it a faith or a combination of social historical and cultural events And how has Islamic art impacted on the contemporary arts of the Islamic world The other issue is that of the meanings to be given to forms like domes so characteristic of Islamic art or to terms like symbol signs or aesthetic values in the arts especially when one considers the contemporary world The Islamic examples allow for the development of new intellectual positions for the history and criticism of the arts everywhere

**Beyond Genius** Bulent Atalay, 2023-11-07 An in depth and unified exploration of genius in the arts and sciences through the life and works of five seminal intellectual and cultural figures Leonardo da Vinci William Shakespeare Isaac Newton Ludwig von Beethoven and Albert Einstein Who among us hasn't read Hamlet listened to the Fifth Symphony gazed at the Mona Lisa or marveled at the three laws of physics and the Theory of Relativity and been struck with the same simple

question how on Earth did they do it Where did these masters draw inspiration to produce some of the most stunning achievements in human history Were their brains wired differently than ours Did they have special traits or unique experiences that set them on the path to greatness Genius is a broad and elusive concept one that is divisive and hard to define and gravely misunderstood There are ordinary geniuses who achieve remarkable feats of brilliance as well as magicians a term James Gleick invoked to describe Richard Feynman who make an outsize impact on their given field But highest among them are transformative geniuses those rare individuals who redefine their fields or open up new universes of thought altogether These are the masters whose genius Bulent Atalay decodes in his engrossing enlightening and revelatory book No Atalay doesn't have a road map for how we might become the next Einstein or Leonardo but his revolutionary study of genius gives us a stunning new lens through which to view humanity's most prolific thinkers and creators and perhaps pick up some inspiration along the way At first it seems that transformative geniuses don't follow any sort of topography Their prodigious output looks effortless they leap from summit to summit and they probably couldn't explain exactly how they went about solving their problems They might not even recognize themselves in the ways we talk about them today Atalay argues that these heroes fit more of a mold than we might think As evidence he rigorously dissects the lives traits habits and thought patterns of five exemplars Leonardo Shakespeare Newton Beethoven and Einstein to map the path of the transformative genius How did Beethoven who could not perform basic multiplication innately encode the Fibonacci Sequence in his symphonies Is it possible that we understate Shakespeare's poetic influence How did Leonardo become equally prolific in both the arts and the sciences How did Newton formulate the universal laws of physics the basis of so many other sciences And what prompted TIME Magazine to declare Einstein a man whose very name is synonymous with genius the Individual of the 20th Century With great clarity and attention to detail Atalay expertly traces how these five exemplars ascended to immortality and what their lives and legacies reveal about how transformative geniuses are made

*Esthetics of the Moment* Thomas M. Kavanagh,2015-11-16 The literature and art of the French Enlightenment is everywhere marked by an intense awareness of the moment The parallel projects of living in representing and learning from the moment run through the Enlightenment s endeavors as tokens of an ambition and a heritage imposing its only and ultimately impossible cohesion In this illuminating study Thomas M Kavanagh argues that Enlightenment culture and its tensions contradictions and achievements flow from a subversive attention to the present as present freed from the weight of past and future Examining a wide sweep of literary and artistic culture Kavanagh argues against the traditional view of the Age of Reason as one of coherent recognizable ideology expressed in a structured narrative form In literature he analyzes the moment at work in the inebriating lightness of Marivaux s repartee the new found freedom of Lahontan s and Rousseau s ideals of a consciousness limited to the present Diderot s championing of Epicurean epistemology Graffigny s portrayal of abrupt cultural displacement and Casanova s penchant for chance s redefining moment The moment in art theory and practice is explored in such forms as de Piles s defense of color Du Bos s foregrounding of perception Watteau s indulgence in a corporeal present Chardin s dismantling of mimesis and Boucher s and Fragonard s thematics of desire
