Narratives of Addiction Kevin McCarron,2022-01-03 Narratives of Addiction Savage Usury is the first book to argue in the face of more than a century s received wisdom that drug addiction and alcoholism are undoubtedly evidence of individual moral flaws However the sense of morality that underlies this book is completely severed from Christianity Instead it is influenced in particular by the writings of the nineteenth century German philosophers Arthur Schopenhauer and Frederick Nietzsche both of whom insisted that a genuine morality was actually incompatible with Christianity The sequence of chapters moves from addictions on the streets into rehab clinics and finally into the meetings of Alcoholics Anonymous and Narcotics Anonymous This is the first book to argue that the search for pleasure drives alcoholism and drug addiction and not the numbing of pain Throughout the book I reject the claims of the medical profession as embodied by the American Medical Association that drug addiction and alcoholism are diseases and further argue that they do not have the authority to tell hundreds of millions of Americans that addiction is not a moral failing I also query throughout the book the claims of neuroscience psychology and the social sciences that addictions to alcohol and drugs are attributable to causes that their specific disciplines are best suited to understand I argue that there is nothing complex about addiction it is a simple behavioural disorder The language routinely employed to discuss addiction is similarly not complex just confused and so it is also the rhetoric of addiction discourse especially its use of simile metaphor and euphemism that this book evaluates

Relevance and Narrative Research Matei Chihaiia, Katharina Rennhak, 2019-03-28 Relevance is one of the most widely used buzz words in academic and other socio political discourses and institutions today which constantly ask us to be relevant To date there is no profound scholarly conceptualization of the term however which is widely accepted in the humanities Relevance and Narrative Research closes this gap by initiating a discussion which turns the vaguely defined evaluative tool relevance into an object of study The contributors to this volume do so by firmly situating questions of relevance in the context of narrative theory Briefly put they ask either What can relevance do for narrative research or What can narrative research do for better understanding relevance or both The basic assumption is that relevance is a relational term Further assuming that most if not all relations which human beings encounter within their cultures are narratively constructed the contributors to this volume suggest that reflections on narrative and narrative research are fundamental to any endeavor to conceptualize notions of relevance
