

*Major prize to Richard Rhodes
for 'The Making of the Atomic Bomb'*

"a strong intellectual adventure, and a clear, fast-paced and indispensable
book, at even as which our future depends. From Einstein describing his
intellectual development as 'stunted' to Edward Teller saying, 'world govern-
ment was only hope for survival,' the book is surprising and revealing."

—Carl Sagan

"Rhodes' *The Making of the Atomic Bomb* is the best, the richest, and the deepest
description of the development of physics in the last half of this century that I have
written, and it is certainly the most enjoyable."

—Isaac Asimov

"Mr. Rhodes has given a convincing portrait of an era and provided lucid
explanations of the science and technology behind the creation of the atomic
bomb. Moreover, he has brought a huge cast of fascinating characters to life
on the page. This long rich book is filled with suspense. It is the comprehensive
history of the bomb, and it is also a work of literature."

—Tacy Kiddier

"... what most deeply impressed me with the author's knowledge of much of the
history of the science which led to the development of nuclear energy and nuclear
bombs, and of the personalities which contributed to the U.S. to the development
of them. I was particularly impressed by his indication of the importance of the
Soviet contribution, which are almost always underestimated but which he
fully realizes and perhaps even overstates. I hope the book will find a wide
reading."

—Eugene P. Wigner,
Nobel Laureate for Physics, 1962

"Rhodes' *The Making of the Atomic Bomb* is well written, interesting and one of the
best on the scientific side of the subject. It is fascinating as a history, and I
have learned from it many things I did not know. Mr. Rhodes has done his
homework thoroughly and intelligently."

—Enrico Fermi,
Nobel Laureate for Physics, 1938

—Ruth W. Alvarez,
Nobel Laureate for Physics, 1948
