HOW TO USE JUMPER CABLES AND A BOOSTER BATTERY

BEFORE STARTING

- 1. Make sure the vehicle's battery is fully charged and the engine is off.
- 2. Make sure the jumper cables are in good condition and the booster battery is fully charged.
- 3. Make sure the vehicle's battery is not frozen and the electrolyte level is correct.

CONNECTING THE CABLES

Figure 2

When using jumper cables, always connect the positive terminal of the booster battery to the positive terminal of the vehicle's battery. Never connect the negative terminal of the booster battery to the negative terminal of the vehicle's battery. This can cause a short circuit and damage the batteries.

STARTING THE ENGINE

- 1. Turn the ignition key to the "ON" position and the engine to the "START" position.
- 2. If the engine does not start, wait for 30 seconds and try again.
- 3. If the engine still does not start, disconnect the jumper cables and call for assistance.

After starting the engine, let it run for at least 15 minutes to allow the battery to recharge. Then, disconnect the jumper cables and drive the vehicle for at least 30 minutes to fully charge the battery.

If the engine does not start after three attempts, disconnect the jumper cables and call for assistance. Do not attempt to start the engine again until the battery has been fully charged.
