recording of fictitious revenues could be avoided or at least greatly mitigated. Frauds related to missing duplicated and identical invoices can also be greatly curtailed. As a result, the advent of blockchain will enable auditors to reduce substantive testing as inherent and control audit risks will be reduced, thereby greatly improving an audit's detection risk. As such, the continuing use and popularity of blockchain will mean that auditors and information systems security professionals will need to deepen their knowledge of this disruptive technology. If you are looking for a comprehensive study and reference source on blockchain technology, look no further than *The Auditor's Guide to Blockchain Technology: Architecture, Use Cases, Security and Assurance*.
