Although the clinical outcomes of this procedure have been constantly improving, the care of patients undergoing lung transplantation is still a striking challenge for the entire team involved in the process. The complexity of a clinical lung transplant program requires a trained multi-specialist team and continuing technical update. Technology provides exciting new opportunities for the improvement of clinical outcomes. This text provides a comprehensive practical and up to date insight into clinical lung transplantation. It moves along the pre-intra and post-operative phases of transplantation. It explores the most relevant surgical, medical and immunological concepts of this field. The content focuses not only on the technical, scientific and medical aspects of lung transplantation but also on the administrative, regulatory and nursing topics of running a lung transplant program.
