Giunta, 2009-02 Practical Chemistry Dr. Ajay Sharma, Dr. Gaytri Prasad, Dr. Praveen Singh Gehlot, 2024-07-12 The university grant commission UGC has proposed a certain defined new syllabus or curriculum for Indian universities according to NEP The changes are made in the syllabus or curriculum from time to time by educationalists or committees to bring uniformity to the education system In this book all the experiments are included with their principles and according to the syllabus of Indian universities. The flow and constancy have been kept in this book so that students can learn and understand every corner of practical chemistry especially students in their first year who came from school education. The book is written in simple systematic and easy language so students can grasp and learn the practical view of theories and principles Each chapter of this book starts with a brief introduction of theories and principles of experiments and then experimental procedures are explained. The pre knowledge of any experiments helps to understand a deep sense of Theories The flow charts are given within the chapter to memorize some analytical procedures Writing the experiments in the record book is suggested at end of the chapter To boost the student's minds logical questions are given in separate chapters so students can prepare themselves for viva voce The method of solution preparation is also described in this book The list of required solutions and reagents of the laboratory are given for information For further knowledge some physical properties and a list of references and books are mentioned at end of the book. This book is the result of experience and efforts in collecting compiling and editing content which makes it useful to students In it an effort has been made to select contents to meet the needs of students or demonstrators who cannot command the unlimited time available or who lack the facilities of library books or references which so often are not conveniently located at centers A worthy task had been accomplished by authors to guide and serve the information regarding experiments.
