Efficacious Technology Management: A Guide for School Leaders Gary Ackerman, 2017-12-03 Efficacious educational technology supports enables and facilitates students as they become full participants in the computer and network rich communication landscape of society Differences between how IT is provided

and managed in other organizations compared to educational organizations can pose challenges for school leaders and the IT professional they hire from other industries. It is through the collaborative efforts of educators, information technology professionals, and school leaders that educational technology becomes efficacious. This book was written to support school professionals, educators, technicians, and leaders as they become efficacious IT managers. It concerns both the decisions they make and the actions they take to ensure the information technology infrastructure installed in schools is useful to teachers as they work with learners as they become citizens in the emerging digital world. This book is intended to help IT professionals understand the world of education and for educators to understand the world of IT. *The Linguistic Challenge of the Transition to Secondary School* Alice Deignan, Duygu Candarli, Florence Oxley, 2022-12-30. This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition which some students struggle with emotionally and academically. The study draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings provided by the project's partner schools. It combines quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers, and subjects. It describes the procedures of corpus compilation and analysis of written and spoken academic language, showing how modern corpus tools can be applied to this far-reaching social and educational issue. It uncovers differences and similarities between the academic language that school children are exposed to at primary and secondary school, contrasting this against the backdrop of the non-academic language that they encounter outside school. This book is important reading for advanced students and researchers in corpus linguistics, applied linguistics, and teacher education. It carries implications for policymakers and schools looking to support students at this critical point in their schooling.
