Experimentology Michael C. Frank, Mika Braginsky, Julie Cachia, Nicholas A. Coles, Tom E. Hardwicke, 2025-07-01 An engaging research methods text integrating a classic approach to conducting experiments in psychology with open science practices and values. How does a researcher run a high quality psychology experiment? What time-tested methods should be used and how can more robust and accurate results be achieved? A dynamic collaboration between groundbreaking cognitive scientist Michael Frank and a diverse cohort of researchers innovating in the field: Mika Braginsky, Julie Cachia, Nicholas Coles, Tom Hardwicke, Robert Hawkins, Maya Mathur and Rondeline Williams. *Experimentology* introduces the art of the modern psychological experiment with an emphasis on open science values of accessibility and transparency. *Experimentology* follows the timeline of an experiment with sections covering basic foundations, planning, execution, data gathering and analysis and reporting. Narrative examples from a range of subdisciplines including cognitive, developmental and social psychology model each component and account for the pitfalls that can undermine the reliability, validity and replicability of results. Through an embrace of open science strategies such as data sharing and preregistration, *Experimentology* shows how the challenges of the replication crisis can be met constructively and collaboratively. Written for a global audience, *Experimentology* updates a classic research methods textbook with a new focus on ethics and the benefits of open science. Bulletin ... Philadelphia (Pa.). Mercantile Library Company, 1897 *The Publisher*, 1902 When Science Meets Power Geoff Mulgan, 2023-11-08 Science and politics have collaborated throughout human history and science is repeatedly invoked today in political debates from pandemic management to climate change. But the relationship between the two is muddled and muddied. Leading policy analyst Geoff Mulgan here calls attention to the growing frictions caused by the expanding authority of science which sometimes helps politics but often challenges it. He dissects the complex history of states' use of science for conquest, glory and economic growth and shows the challenges of governing risk from nuclear

weapons to genetic modification artificial intelligence to synthetic biology He shows why the governance of science has become one of the biggest challenges of the twenty first century ever more prominent in daily politics and policy Whereas science is ordered around what we know and what is politics engages what we feel and what matters How can we reconcile the two so that crucial decisions are both well informed and legitimate The book proposes new ways to organize democracy and government both within nations and at a global scale to better shape science and technology so that we can reap more of the benefits and fewer of the harms Also available as an audiobook *Catalog of Copyright Entries.
