**Topics in Geometric Group Theory** Pierre de la Harpe,2000-10-15 In this book Pierre de la Harpe provides a concise and engaging introduction to geometric group theory a new method for studying infinite groups via their intrinsic geometry that has played a major role in mathematics over the past two decades A recognized expert in the field de la Harpe adopts a hands on approach illustrating key concepts with numerous concrete examples The first five chapters present basic combinatorial and geometric group theory in a unique and refreshing way with an emphasis on finitely generated versus finitely presented groups In the final three chapters de la Harpe discusses new material on the growth of groups including a detailed treatment of the Grigorchuk group Most sections are followed by exercises and a list of problems and complements enhancing the book s value for students problems range from slightly more difficult exercises to open research problems in the field An extensive list of references directs readers to more advanced results as well as connections with other fields

### **Arithmetic and Geometry of K3 Surfaces and Calabi-Yau**

**Threefolds** Radu Laza,Matthias Schütt,Noriko Yui,2013-06-12 In recent years research in K3 surfaces and Calabi Yau varieties has seen spectacular progress from both arithmetic and geometric points of view which in turn continues to have a huge influence and impact in theoretical physics in particular in string theory The workshop on Arithmetic and Geometry of K3 surfaces and Calabi Yau threefolds held at the Fields Institute August 16 25 2011 aimed to give a state of the art survey of these new developments This proceedings volume includes a representative sampling of the broad range of topics covered by

the workshop While the subjects range from arithmetic geometry through algebraic geometry and differential geometry to mathematical physics the papers are naturally related by the common theme of Calabi Yau varieties With the big variety of branches of mathematics and mathematical physics touched upon this area reveals many deep connections between subjects previously considered unrelated Unlike most other conferences the 2011 Calabi Yau workshop started with 3 days of introductory lectures A selection of 4 of these lectures is included in this volume These lectures can be used as a starting point for the graduate students and other junior researchers or as a guide to the subject   **Applied mechanics reviews**
