## Atls 2016:

Contemporary Developments and Perspectives in International Health Security Stanislaw P. Stawicki, Michael S. Firstenberg, Sagar C. Galwankar, Ricardo Izurieta, Thomas Papadimos, 2021-01-07 International health security IHS is a broad and highly heterogeneous area. Within this general context, IHS encompasses subdomains that potentially influence and more specifically endanger the well-being and wellness of humans. The general umbrella of IHS includes but is not limited to natural disasters, emerging infectious diseases, EID, and pandemics, rapid urbanization, social determinants of health, population growth, systemic racism and discrimination, environmental matters, civilian violence and warfare, various forms of terrorism, misuse of antibiotics, and the misuse of social media. The need for this expanded definition of health security stems from the realization that topics such as EID, food, water, and pharmaceutical supply chain safety, medical and health information, cybersecurity, and bioterrorism, although important within the overall realm of health security, are not only able to actively modulate the wellness and health of human populations but also tend to do so in a synergistic fashion. This inaugural tome of a multi-volume collection, *Contemporary Developments and Perspectives in International Health Security*, introduces many of the topics directly relevant to modern IHS theory and practice. This first volume provides a solid foundation for future installments of this important and relevant book series.

Education and the General Surgeon An Issue of Surgical Clinics E Book      *Advancing the Global Agenda for Human Rights, Vulnerable Populations, and Environmental Sustainability* Mary V. Alfred, Petra A. Robinson, Elizabeth A. Roumell, 2021-10-01

For over 70 years the United Nations has worked to advance human conditions globally through its historic agenda for a more peaceful prosperous and just world. Through the work of the General Assembly and other programs like the UNESCO World Conferences on Adult Education the organization has taken a leading role in bringing world leaders together to dialogue on world issues and to set agendas for advancing social and economic justice among and within the regions of the world. The underlying themes of the United Nations agenda over the years have been world peace economic justice addressing the needs of the world's most vulnerable populations and protecting the environment. We draw from the two last two declarations from which the Millennium Development Goals September 2000 and the Sustainable Development Goals September 2015 were adopted by world leaders with a focus on addressing the needs of the most vulnerable populations. In this declaration world leaders committed to uphold the long standing principles of the organization and to combat extreme poverty hunger disease illiteracy environmental degradation and discrimination and violence against women. The overall objective of the book is to highlight the conditions of vulnerable populations from various contexts globally and the role adult and higher education can play and is playing in advancing the United Nations agenda of social and economic justice and environmental sustainability. Adult education through research teaching and service engagements is contributing to this ongoing effort but as many scholars have noted our work remains invisible and undocumented. Therefore this book highlights adult education's critical partnership in addressing these global issues. It will also begin to fill the void that exists in adult
