Advanced Topics in Statistical Process Control Donald J. Wheeler, 1995-01-01 **Advances in Manufacturing IV** Justyna Trojanowska, Agnieszka Kujawińska, Ivan Pavlenko, Jozef Husar, 2024-03-29 This book describes cutting edge research and technologies aimed at increasing the efficiency of production processes and supporting the implementation of Industry 4.0 and Industry 5.0 solutions in production. Gathering peer review contributions to the 8th International Scientific Technical Conference MANUFACTURING 2024 held on May 14-16, 2024 in Poznan, Poland, it reports on research on and applications of artificial intelligence and digital technologies to improve the production process. It also presents augmented virtual and mixed reality tools that can be used or have been tested in the manufacturing industry and for education and training purposes. Last but not least, it highlights cutting edge solutions for green and sustainable production. Statistical Quality Control: A Loss Minimization Approach Dan Trietsch, 1999-04-14 While many books on quality espouse the Taguchi loss function, they do not examine its impact on statistical quality control (SQC). But using the Taguchi loss function sheds new light on questions relating to SQC and calls for some changes. This book covers SQC in a way that conforms with the need to minimize loss. Subjects often not covered elsewhere include: i) measurements; ii) determining how many points to sample to obtain reliable control charts for which purpose a new graphic tool, confidence charts, is introduced; iii) the connection between process capability and tolerances; iv) how to adapt Deming's 3σ rule to quadratic loss; v) how to adjust without tampering. We also discuss the efficiency of various statistics and how control chart constants are derived.
