Advanced Wealth Transfer Under New Tax Laws:

Controversies in Tax Law Anthony C. Infanti, 2016-03-03 This volume presents a new approach to today's tax controversies reflecting that debates about taxation often turn on the differing worldviews of the debate participants. For instance, a central tension in academic tax literature which is filtering into everyday discussions of tax law exists between mainstream and critical tax theorists. This tension results from a clash of perspectives: Is taxation primarily a matter of social science or of social justice? Should tax policy debates be grounded in economics or in critical race, feminist, queer, and other outsider perspectives? To capture and interrogate what often seems like a chasm between the different sides of tax debates, this collection comprises a series of pairs of essays. Each pair approaches a single area of controversy from two different perspectives, with one essay usually taking a mainstream perspective and the other a critical perspective. In writing their contributions, the authors read and incorporated reactions to each other's essays and paid specific attention to the influence of perspective on both the area of controversy and their contribution to the debate. With contributions from leading mainstream and critical tax scholars, this volume takes the first step toward bridging the gap between these differing perspectives on tax law and policy.

Clements, Ruud A. de Mooij, Mr. Sanjeev Gupta, Mr. Michael Keen, 2015-09-21 The sizeable increase in income inequality experienced in advanced economies and many parts of the world since the 1990s and the severe consequences of the global economic and financial crisis have brought distributional issues to the top of the policy agenda The challenge for many governments is to address concerns over rising inequality while simultaneously promoting economic efficiency and more robust economic growth The book delves into this discussion by analyzing fiscal policy and its link with inequality Fiscal policy is the government's most powerful tool for addressing inequality It affects households consumption directly through taxes and transfers and indirectly via incentives for work and production and the provision of public goods and individual services such as education and health An important message of the book is that growth and equity are not necessarily at odds with the appropriate mix of policy instruments and careful policy design countries can in many cases achieve better distributional outcomes and improve economic efficiency Country studies on the Netherlands China India Republic of Congo and Brazil demonstrate the diversity of challenges across
