Advances In Fisheries Economics

Ragnar Arnason

Advances In Fisheries Economics:

Advances in Fisheries Economics Trond Bjørndal, Daniel Gordon, Ragnar Arnason, Ussif Rashid Sumaila, 2008-04-15 A true landmark publication *Advances in Fisheries Economics* brings together many of the world's leading fisheries economists to authoritatively cover the many issues facing the field of fisheries economics and management today. Compiled in honour of the work and achievements of Professor Gordon Munro of the University of British Columbia, Canada, this exceptional volume of research serves as both a valuable reference tool and fitting tribute to a man whose work has shaped the discipline. Divided into four sections, the text includes coverage of Property Rights and Fisheries Management, Capital Theory and Natural Resources, Game Theory and International Fisheries, and Applied Fisheries Economics and Management. The book is an important addition to the resources of all fisheries economists, managers, scientists, and fish biologists. Libraries in universities and research establishments where these subjects are studied and taught should have copies on their shelves. About the Editors: Dr Trond Bjørndal is Professor of Economics, Centre for Fisheries Economics, Institute for Research in Economics and Business Administration, Bergen, Norway, and Director, CEMARE, University of Portsmouth, England. Dr Daniel V. Gordon is Professor of Economics, University of Calgary, Canada, and Distinguished Research Fellow, Centre for Fisheries Economics, Institute for Research in Economics and Business Administration, Bergen, Norway. Dr Ragnar Arnason is Professor of Economics and the Chairman of the Institute of Economic Studies, University of Iceland. Dr U. Rashid Sumaila is Director of the Fisheries Economics Research Unit, Fisheries Centre, University of British Columbia.

Economics Research Unit Fisheries Centre University of British Columbia Recent Developments in Fisheries Economics
 Ussif Rashid Sumaila, Gordon R. Munro, Jon G. Sutinen, 2010-03-01 Articles cover a wide variety of recent topical issues in fisheries economics and the latest developments in the field including marine protected areas individual transferable quotas fisheries subsidies habitat values data fouling and rotational management of sedentary fishery resources Seven of the articles were presented at the 2005 North American Association of Fisheries Economics Forum at the University of British Columbia in Vancouver Canada Advances in Fisheries Bioeconomics Juan Carlos Seijo, Jon G. Sutinen, 2018-04-17 Efforts to effectively conserve and manage marine resources are facing increasing complexity of environmental and governance challenges To address some of these challenges this book presents advancements in fisheries bioeconomics research that provides significant ideas for addressing emerging environmental and fisheries management issues Advances in Fisheries Bioeconomics gives insights into innovative approaches dealing with these issues as well as novel ideas on changes in fisheries management paradigms With contributions from leading experts in the field this book offers an examination of a number of topics including ecosystem based fisheries management by catch management and discard bans the number of players in the fisheries game the effects of ocean acidification and the trends and impacts of eco labeling and eco certification of fisheries Through integrating resource biology and ecology with the economics of fishers behaviour the authors provide valuable analysis of the current issues in fisheries management This book will be of interest to those on advanced courses in fisheries science natural resource biology and ecology and environmental and natural resource economics It will also appeal to researchers policy makers and advocacy groups around the world **Recent developments and research in fisheries economics** Conference on Fisheries Economics (1965, 1967 Advances in Fisheries Science
 Andrew I. L. Payne, John Cotter, Ted Potter, 2009-01-22 This timely book brings readers up to date on the wide range of advances made in fisheries science since the publication in 1957 of On the Dynamics of Exploited Fish Populations Beverton and Holt regarded by many fisheries scientists as one of the most important books on fisheries yet published Traditional fishery subjects covered include historic declines and changes in fishing fleets fisheries management and stock assessments data poor situations simulation and modelling of fished stocks fisheries economics assessing reproductive potential and dispersal of larvae fisheries for sharks and rays and use of marine technology Additionally related subjects of increasing importance now that ecological approaches to management are coming to the fore are presented They include benthic ecology ecosystem changes linked to fishing life history theory the effects of chemicals on fish reproduction and use of sounds in the sea by marine life Several chapters offer stimulating philosophical discussion of the many controversial areas still existing This significant book edited by Andy Payne John Cotter and Ted Potter and containing contributions by world renowned fisheries scientists including many based at Cefas where Beverton and Holt's original work was carried out is an essential purchase for fisheries managers and scientists fish biologists marine scientists and ecologists Libraries in all

universities and research establishments where fisheries and biological sciences are studied and taught are likely to need copies of this landmark publication *The Economics and Management of World Fisheries* Trond Bjørndal, Gordon Munro, 2012-10-25 Capture fisheries make contributions to the world economy that are below their potential Many of the world's capture fishery resources have been overexploited with some facing collapse This book presents an overview of the current economics of capture fisheries and examines how they can achieve their full economic potential Essays on the Economics of Migratory Fish Stocks Ragnar Arnason, Trond Bjørndal, 2012-12-06 Following the publication of seminal papers by professors H S Gordon in 1954 and A D Scott in 1955 active research has led to rapid progress in our understanding of the economics of fisheries Fishing however is a complicated activity involving intricate interactions between man made fishing capital and naturally produced fish stocks in an inherently dynamic and stochastic setting Consequently in spite of significant advances important sections of fisheries economics remain largely unexplored One such area is the economics of migratory fish stocks In 1985 the editors of this volume embarked on a research project concerned with the optimal utilization of common Nordic fish stocks A fundamental feature of some of the most important of these fish stocks such as the Atlanto Scandian herring and the Icelandic capelin is their migratory behaviour Not only do the migrations continuously alter the economic conditions for harvesting these species They also result in the periodical transfer of stock concentrations from one exclusive fisheries jurisdictions to another It was readily apparent that this behaviour constituted a crucial determinant of the appropriate harvesting pattern of these stocks More importantly however migrations are by no means a unique feature of Nordic fish stocks In fact it appears that migratory behaviour is exhibited albeit in varying degrees by all species of fish It therefore stands to reason that migrations constitute an important aspect of the economics of fisheries in general

Handbook for fisheries socio-economic sample survey: Food and Agriculture Organization of the United Nations, 2018-11-08 This document provides tested and standardized tools to collect the data needed for a socio economic assessment of a fishery including sampling design quality checks and how to transform inputs into statistics **Marine Fisheries Economics and Development in India** S. M. Ali, 1996 A case study of Orissa India **Bulletin of the Bureau of Fisheries**, 1894 **Advances in Fisheries Science** Andrew I. L. Payne, A. John R. Cotter, Ted Potter, 2008-04-28 Traditional fishery subjects covered include historic declines and changes in fishing fleets fisheries management and stock assessments data poor situations simulation and modelling of fished stocks fisheries economics assessing reproductive potential and dispersal of larvae fisheries for sharks and rays and use of marine technology Additionally related subjects of increasing importance now that ecological approaches to management are coming to the fore are presented They include benthic ecology ecosystem changes linked to fishing life history theory the effects of chemicals on fish reproduction and use of sounds in the sea by marine life Several chapters offer stimulating philosophical discussion of the many controversial areas still existing Back cover *Management of Marine Fisheries in Canada* L. S. Parsons, National Research Council

Canada, Canada. Department of Fisheries and Oceans, 1993 This report describes and evaluates the impact of the major changes in the management of Canada's marine fisheries in recent decades The report covers the historical and jurisdictional context biological and economic aspects objectives of fisheries management techniques of resources management in general and those used for specific species managing the common property through allocation of access limited entry licensing and individual quotas the international dimension the social dimension habitat management fisheries enforcement and fisheries management in the United States Australia New Zealand Norway Iceland and the European Community

Essays on the Economics of Migratory Fish Stocks Ragnar Arnason, 1991 Advanced Mathematical Methods for Economic Efficiency Analysis Pedro Macedo, Victor Moutinho, Mara Madaleno, 2023-06-21 Economic efficiency analysis has received considerable worldwide attention in the last few decades with Stochastic Frontier Analysis SFA and Data Envelopment Analysis DEA establishing themselves as the two dominant approaches in the literature This book by combining cutting edge theoretical research on DEA and SFA with attractive real world applications offers a valuable asset for professors students researchers and professionals working in all branches of economic efficiency analysis as well as those concerned with the corresponding economic policies The book is divided into three parts the first of which is devoted to basic concepts making the content self contained The second is devoted to DEA and the third to SFA The topics covered in Part 2 range from stochastic DEA to multidirectional dynamic inefficiency analysis including directional distance functions the elimination and choice translating algorithm benefit of the doubt composite indicators and internal benchmarking for efficiency evaluations Part 3 also includes exciting and cutting edge theoretical research on e g robustness nonparametric stochastic frontier models hierarchical panel data models and estimation methods like corrected ordinary least squares and maximum entropy

Developments in International Fisheries Law Ellen Hey, 2021-10-05 Sustainable Fishery Systems Anthony Charles, 2023-06-20

SUSTAINABLE FISHERY SYSTEMS An up to date and interdisciplinary guide to sustainable fisheries Fisheries whether small scale or large scale are filled with complexity and uncertainty Making the right decisions to successfully manage fisheries for sustainability and resilience requires a systems approach including both natural and human elements and their many interactions To understand fisheries and how they change over time a diverse range of fishery knowledge must be brought together Sustainable Fishery Systems 2nd edition meets these needs The new edition provides essential information that can be readily applied within government community industrial academic and research settings Sustainable Fishery Systems 2nd edition retains the first edition's emphasis on themes such as sustainability resilience uncertainty complexity and conflict and expands its treatment of topics that have since the first edition's publication become crucial to consider in the field of fisheries As a result readers will find Updated and expanded coverage of topics including coastal conservation ecosystem based management co management community based management and more New chapters covering connections between fisheries and marine protected areas biodiversity conservation climate and fisheries and multi sectoral management A more

detailed introduction to the systems perspective of fisheries reflecting the substantial growth in that subject's importance and covering in detail the natural human and governance aspects of fisheries Sustainable Fishery Systems 2nd edition is an indispensable interdisciplinary resource for educators researchers government agencies and fisheries managers *House documents*, 1894 **National Estuary Study: Appendix. E: Some economic factors affecting the estuary zone including market outlooks for estuary products; Appendix. F: Technological impacts on estuary resource use; Appendix. G: Conflicts and problems in specific estuaries** United States. Bureau of Sport Fisheries and Wildlife, 1970
