Ward, 1999-03-26 A 19.3 million Department of Defense grant to Rice University funds the Advanced Applied Technology Demonstration Facility AATDF. It is targeted to decision makers and anyone concerned with the design or implementation of these technologies. Williams, Robert J. Timko, 1984 The Bureau of Mines laboratory tested the response of a commercially available real time aerosol monitor GCA RAM I to various dusts Monitor measurements were recorded averaged and compared with simultaneous gravimetric measurements of each test dust Tests usually lasted several hours The test dusts of various particle size distributions used included coal limestone and a commercially available test dust For each particular dust the monitor response was linear and correlated well with mass concentration over the range of about 0.5 to 10 mg m³ The monitor can estimate a 2.0 mg m³ respirable coal dust concentration within as little as 6 pet with 95 pet confidence The monitor must however be calibrated with the dust to be measured because the instrument response is affected by the type of dust particle The average monitor response to a mass concentration of coal dust was approximately twice the average monitor response to the same mass concentration of limestone dust *The Science of Hair Care* Claude Bouillon, John Wilkinson, 2005-02-28 The most comprehensive source on the subject this Second Edition is completely revised and expanded to reveal the most recent advances technologies and trends in hair and hair care science tracking the development of hair care products the emergence of new regulatory practices and the latest methods in product safety and efficacy assessment
