White,2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United State Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are encouraged to consult the U S Air Force Academy Friends of the Library publication *The Genesis of Flight The Aeronautical History Collection* of Colonel Richard Gimbel **The Panavia Tornado** Michael Leek,2015-07-30 Through a collection of dramatic and informative photographs supplemented by cutaway illustrations this book highlights the agility and flexibility of this dedicated RAF aircraft Throughout the course of its career it has formed the backbone of the RAF across its many different theaters of operation Utilized in a strike anti aircraft air superiority air defense reconnaissance electronic warfare and fighter bomber capacity this aircraft type has enjoyed an immensely varied career Each aspect is illustrated in this photographic celebration The book includes photographs by the author and a select number of other amateur photographers with the vast majority of photographs never previously published taken low level around the hills and mountains of England Scotland and Wales This impressive new photographic publication will be presented in full colour and is sure to be prized as a collector's piece amongst fans of the genre *Aerospace Historian* ,1981 **Air Force Magazine** ,2000-07 *Air Force* Chester G. Hearn, From its beginnings in 1907 as the Aeronautical Division of U S Armys Signal Corps which consisted of one officer and two enlisted men the United States Air Force has grown to become the foremost aerial armed force in the world Although they had to fly French and British planes as the fledgling army aeronautical bureaucracy failed to procure any combat worthy American aircraft which arguably did not exist American aviators performed valiantly in World War I with intrepid pilots of the such as Eddie

Rickenbacker and Frank Luke leading the way Between the wars all of aviation commercial and military around the world grew by leaps and bounds as the numbers of aircraft in service and their capabilities tremendously increased Although the Army Air Corps as it was known at the time was no better prepared for World War II than the rest of the army it had developed a highly professional corps of experienced officers who would be able to take advantage of the latest American aircraft technology such as the B 17 Flying Fortress and the P 51 Mustang With the end of the war and the creation of an independent armed force in 1947 the United States Air Force leapt into the jet age with such icons as the F 86 Sabre and the remarkable B 52 Stratofortress which soldiers on today more than fifty years after going into service in 1955 and with the youngest of the 744 plane production run being forty years old having been built in 1962 Air Force covers the entire history of the U S Air Force and its development from its beginnings early in the last century to becoming the worlds largest most powerful and most versatile air combat force Special attention is paid to the air forces recent post Vietnam history and an entire chapter is devoted to Americas air force of the future

The Cutting Edge Mark A. Lorell,Hugh P. Levaux,Elizabeth Giddens,Jennifer Gross,Erik Moller,1998-10-20 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine

the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers

American Military Training Aircraft E.R. Johnson,2015-02-12 The U S did not become the world s foremost military air power by accident The learning curve World War I World War II the Korean War the Vietnam War the Gulf War and more recently the war on terror has been steep While climbing this curve the U S has not only produced superior military aircraft in greater numbers than its foes but has in due course out trained them too This book provides a comprehensive historical survey of U S military training aircraft including technical specifications drawings and photographs of each type of fixed and rotary wing design used over a 98 year period to accomplish the first step of the learning process the training of pilots and aircrews

Russian Aviation and Air Power in the Twentieth Century John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes

Scientific and Technical Aerospace Reports ,1978-10

Lavi John W. Golan,2016 The largest weapons development effort ever undertaken by the State of Israel the Lavi fighter program envisioned a new generation of high performance aircraft Controversially Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with U S financial support The sophisticated planes developed in the mid 1980s were unique in design and intended to make up the majority of the Israeli Air Force Though a great deal of prestige and money was staked developmental costs increased

and doubts arose as to whether the Lavi could be the warplane it was meant to be Eventually the program became a microcosm for the US Israel relationship and of Israeli society itself a study in the ambitions fears and internal divisions that shaped them The fighter never made it to operational service Despite the passage of time since its cancelation the Lavi remains a controversial subject within Israeli society to this day Until now the full breadth and significance of the Lavi story has never been told Lavi Israel s Lost Winged Lion traces the evolution of the Lavi fighter from its genesis in the 1970s to its demise in August of 1987 Painting the era s political landscape on both sides of the ocean author John Golan examines the roles of such Israeli military icons and political leaders as Ezer Weizman Ariel Sharon Menachem Begin and Yitzhak Rabin On the American side Golan traces the evolution of U S government policy towards the program detailing a complex nuanced picture of the U S foreign policy apparatus and of U S Israel relations in general from President Reagan s public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger s unremitting attempts to cancel the program in succeeding years
