The Rover of the Andes A Tale of Adventure on South America R. M. Ballantyne, 2019-05-09 Excerpt Towards the close of a bright and warm day between fifty and sixty years ago a solitary man might have been seen mounted on a mule wending his way slowly up the western slopes of the Andes Although decidedly inelegant and unhandsome this specimen of the human family was by no means uninteresting He was so large and his legs were so long that the contrast between him and the little

mule which he bestrode was ridiculous He was what is sometimes styled loosely put together nevertheless the various parts of him were so massive and muscular that however loosely he might have been built up most men would have found it rather difficult to take him down Although wanting in grace he was by no means repulsive for his face which was ornamented with a soft flaxen beard and moustache of juvenile texture expressed wonderful depths of the milk of human kindness
