Glaucoma Imaging Antonio Ferreras, 2015-10-21 This atlas offers a truly comprehensive update on the use of imaging technologies for the diagnosis and follow up of glaucoma. In addition to standard automated perimetry, gonioscopy, fundus photography and stereophotography, other advanced high resolution methods for imaging the eye in glaucoma are explained in detail, including ultrasound, biomicroscopy, confocal scanning laser ophthalmoscopy, scanning laser polarimetry and spectral domain optical coherence tomography. The role of the various tests and the keys to optimizing their use in clinical practice are detailed with the aid of high quality figures in order to enable the reader to achieve the best possible performance when applying these tools. The risk of developing visual disability and blindness as a consequence of glaucoma varies widely among affected individuals. Personalized testing strategies and tailored therapeutic interventions are required to effectively reduce visual impairment due to glaucoma. Glaucoma Imaging will assist residents, researchers and clinicians in improving their ability to understand and integrate the information obtained using traditional techniques with the reports provided by computer assisted image instruments.

Oxford IB Diploma Programme: Economics Course Book Jocelyn Blink, Ian Dorton, 2020-02-27 This comprehensive and engaging text developed in cooperation with the IB follows the new curriculum for first assessment in 2022. With accessible, engaging lessons, students will actively relate economics to real world issues and the global economy. The international examples and case studies encourage students to analyse economics in terms of present day challenges and concerns. Conceptual links are provided to help students understand the overarching big questions that relate economics to the multi-faceted challenges of the world economy, including how it works and changes over time. Through inquiry-based tasks and links to TOK and ATL activities, students will gain a deep understanding of economics. Practice activities will develop the skills required to succeed in the IB assessment, including exam-style questions and data response questions. Clear explanations will help students achieve assessment success. About the Series Oxford's IB Diploma Course Books are essential resource materials designed in cooperation with the IB to provide students with extra support through their IB studies. Course Books provide advice and guidance on specific course assessment requirements, mirroring the IB philosophy and providing opportunities for critical thinking.

Acoustical Imaging Sydney Lees, Leonard A. Ferrari, 2012-12-06 The contents of this volume are the proceedings of the 23rd International Symposium on Acoustical Imaging, which took place 13-16 April 1997 in Boston, Massachusetts. The first Symposium met 25 years ago. Originally the Symposium met in California, then elsewhere within the United States, but beginning in 1988 the Symposia began to meet outside of the United States as well. It is now being held about every eighteen months alternately in the United States and then outside. The present pattern is to hold one meeting in East Asia, then in the USA, then in Europe, and again in the USA. However, for scheduling reasons, the next Symposium will be in Santa Barbara, California, followed by England and then East

Asia It is to be noted that the Symposium is a free standing institution not associated with any other organization Each meeting is the total responsibility of its chairman with the advice of past chairmen Papers are submitted in response to the call for them and reviewed by an International Scientific Advisory Board The quality depends entirely on the response to the call It is gratifying to note that the Symposium has attained the status that attracts high quality contributions despite or perhaps because of the loose structure Two factors that have appeal are that there is only one session and that there is time during the meeting for extensive discussion
