**Plurihistoricity** Zoltán Boldizsár Simon,2025-07-25 This book situates historical scholarship within a plurihistoricity of contemporary historical culture exploring conflicting conceptions of historical change in technological utopias of human enhancement in prospects of human extinction in societal responses to the Anthropocene and in the imperative of bringing colonial patterns of historical injustice to justice Contemporary societies increasingly reclaim history from the academic pursuit of historiography On the one hand societal engagement in history is growing palpably History is literally everywhere in the fallen statues of past political regimes in trajectories of environmental degradation and in technological prospects of space expansion On the other hand societal demand for history seems to diminish rather than strengthen the authority of professionalized historical studies What do these societal historicities stand for How do they create pasts that matter What futures do they desire or attempt to avoid How do they view the historical transitions into those futures And what is the societal role of historical scholarship and scholarly conceptions of history in the plurihistoricity of contemporary historical culture By addressing these questions Simon s book is essential reading for everyone interested in the present and future of viewing the world historically

**The Justification of War and International Order** Lothar Brock,Hendrik Simon,2021 In the past few decades the understanding of the relationship between nations has undergone a radical transformation The role of the traditional nation state is diminishing along with many of the traditional vocabularies which were once used to describe what has been called ever since Jeremy Bentham coined the phrase in 1780 international law The older boundaries between states are growing ever more fluid new conceptions and new languages have emerged which are slowly coming to replace the image of a world of sovereign independent nation states which has dominated the study of international relations since the early nineteenth century This redefinition of the international arena demands a new understanding of classical and contemporary questions in international and legal theory It is the editors conviction that the best way to achieve this is by bridging the traditional divide between international legal theory intellectual history and legal and political history The aim of the series therefore is to provide a forum for historical studies from classical antiquity to the twenty first century that are theoretically informed and for philosophical work that is historically conscious in the hope that a new vision of the rapidly evolving international world its past and its possible future may emerge Book jacket

**The Embarrassment of Being Human** Benjamin Boysen,2024-12-24 With the message that everything in a sense is alive thus allowing us to join forces with new politico ethical communities stretching across human and nonhuman realms the new materialisms have captivated the minds of many academics artists and intellectuals by stressing that it is time to return to a premodern mindset and discard modernity and its concepts of secularization autonomy and finitude The Embarrassment of Being Human not only demonstrates how these magical materialisms are beset by grave theoretical and practical inconsistencies and self contradictions It also demonstrates how their demand for humans to step down and allow for an emancipation of things qualifies the new materialisms as a metaphysics of neoliberalism that reproduces and fortifies the self contradictions rampant in the current neoliberal hegemony While helping us to gain a comprehensive understanding of the tenets of the eerie ills of our epoch the critique of the new materialisms can furthermore inspire us to appreciate how the exact inversion of the new materialist complex amounts to a revitalization of the modern project A revitalization that is critical to think our epoch differently
