Joaquin Phoenix actor I am quite simply in awe of these photographers In a way they are like war photographers except witness to a war that so many people choose to suppress that exists This takes enormous inner strength and bloody minded determination because they cannot save any of the animals that they photograph they can only hope that their photos will help illuminate the mass extermination that unfolds every second of every day across the planet To me they are heroes Not just for one day but over and over and over again

Mourning Animals Margo DeMello, 2016-08-01 We live more intimately with nonhuman animals than ever before in history The change in the way we cohabitate with animals can be seen in the way we treat them when they die There is an almost infinite variety of ways to help us cope with the loss of our nonhuman friends from burial cremation and taxidermy to wearing or displaying the remains ashes fur or other parts of our deceased animals in jewelry tattoos or other artwork to counselors who specialize in helping people mourn pets to classes for veterinarians to tips to help the surviving animals who are grieving their animal friends to pet psychics and memorial websites But the reality is that these practices and related beliefs about animal souls or animal afterlife generally only extend with very few exceptions to certain kinds of animals pets Most animals in most cultures are not mourned and the question of an animal afterlife is not contemplated at all *Mourning Animals* investigates how we mourn animal deaths which animals are grievable and what the implications are for all animals

The Animals' Agenda Marc Bekoff, Jessica Pierce, 2017-04-18 A compelling argument that the time has come to use what we know about the fascinating and diverse inner lives of other animals on their behalf Every day we are learning new and surprising facts about just how intelligent and emotional animals are did you know rats like to play and laugh and also display empathy and the ears and noses of cows tell us how they re feeling At times we humans translate that knowledge

into compassion for other animals think of the public outcry against the fates of Cecil the lion or the captive gorilla Harambe But on the whole our growing understanding of what animals feel is not resulting in more respectful treatment of them

Renowned animal behavior expert Marc Bekoff and leading bioethicist Jessica Pierce explore the real world experiences of five categories of animals beginning with those who suffer the greatest deprivations of freedoms and choice chickens pigs and cows in industrial food systems as well as animals used in testing and research including mice rats cats dogs and chimpanzees Next Bekoff and Pierce consider animals for whom losses of freedoms are more ambiguous and controversial namely individuals held in zoos and aquaria and those kept as companions Finally they reveal the unexpected ways in which the freedoms of animals in the wild are constrained by human activities and argue for a more compassionate approach to conservation In each case scientific studies combine with stories of individual animals to bring readers face to face with the wonder of our fellow beings as well as the suffering they endure and the major paradigm shift that is needed to truly ensure their well being The Animals Agenda will educate and inspire people to rethink how we affect other animals and how we can evolve toward more peaceful and less violent ways of interacting with our animal kin in an increasingly human dominated world

Ecology and Literatures in English Françoise Besson, 2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare's theatre to ecopoetics from travel writing to detective novels from children's books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts
