Business Active Listening. ,1994 *Active listening* Max Editorial, 2023-01-25

LIGHTNING PROMOTION We can all recall situations where we have utterly failed to listen to what someone else is saying. For various reasons, we are simply not taking in anything useful. How many times have you been introduced to a person by name only to not know what their name is thirty seconds later? The reason this happens is because you have failed to actively listen. By italicizing the word *actively*, it might suggest that *actively listening* is different to plain old listening. In truth, there are only two states when we are communicating with another person: *actively listening* and *not really listening*. *Active listening* is the art of listening for meaning. For us to gain meaning from the words of another person, we need to be listening carefully. Meaning is not necessarily assured even when we are actively listening, but we will at least know that we don't understand and can therefore ask the correct questions to gain enlightenment. *Active listening* must become a habit because it is the foundation of effective communication. Imagine a troop commander not really listening to his orders and attacking the wrong target. A failure to actively listen can certainly have dire consequences. Many people give the appearance of listening but fail to really hear what is being said to them. They assume that listening is such a basic sense that it will happen automatically. This is not the case. Or it might be that they are so used to making all the outward gestures of listening that they are convinced it is really happening. It is not difficult to pick up on tone of voice, body language, and facial expressions, all of which indicate the gist of what is being said. All it then takes is to hear a few key words, and it becomes very easy to think you have understood everything you've been told and to give the convincing impression that this is so by returning appropriate tone of voice, body language, and facial expressions.

Active Listening Desmond Gahan, 2017 The way to improve your listening skills is to practice active listening This is where you make a conscious effort to hear not only the words that another person is saying but more importantly try to understand the complete message being sent In order to do this you must pay attention to the other person very carefully You cannot allow yourself to become distracted by whatever else may be going on around you or by forming counter arguments that you ll make when the other person stops speaking Nor can you allow yourself to get bored and lose focus on what the other person is saying All of these contribute to a lack of listening and understanding Tip If you re finding it

particularly difficult to concentrate on what someone is saying try repeating their words mentally as they say them this will reinforce their message and help you stay focused To enhance your listening skills you need to let the other person know that you are listening to what he or she is saying To understand the importance of this ask yourself if you ve ever been engaged in a conversation when you wondered if the other person was listening to what you were saying You wonder if your message is getting across or if it s even worthwhile continuing to speak It feels like talking to a brick wall and it s something you want to avoid Acknowledgement can be something as simple as a nod of the head or a simple uh huh You aren t necessarily agreeing with the person you are simply indicating that you are listening Using body language and other signs to acknowledge you are listening also reminds you to pay attention and not let your mind wander You should also try to respond to the speaker in a way that will both encourage him or her to continue speaking so that you can get the information if you need While nodding and uh huhing says you re interested an occasional question or comment to recap what has been said communicates that you understand the message as well Active Listening Carl Ransom Rogers, Richard Evans Farson, 1975
