Matthew Yung, 2017-08-01 Preface It was a great privilege and honour for me and my deputy chairman Professor Chris Raine to host the 10th International Conference on Cholesteatoma and Ear Surgery Chole2016 in Edinburgh Scotland The Council of the British Society of Otology has helped me tremendously in the preparation of this conference Over 1000 delegates from 54 countries attended Chole2016 on 5-8 June 2016 The scientific programme included 12 keynote lectures on the basic science of chronic ear diseases 23 national symposium 41 round tables two live temporal bone dissections 14 video instructional sessions 18 free paper sessions and poster presentations I sincerely thank all the faculties who contributed to the scientific programs and also the delegates who provided a lively discussion during the scientific sessions It was the exchange of knowledge between the speakers and the delegates that makes the conference so worthwhile to me The aim of Chole2016 was to Bring basic science on chronic ear diseases to the clinicians Achieve consensus in definitions classification and staging of cholesteatoma The first aim was fulfilled by a scientific programme that focused keynotes sessions on basic sciences These proved delegates with a fascinating insight into the cellular biology the role of chronic inflammation genetic advances middle ear mechanics physiology bacteriology stem cell research and novel imaging technologies in the context of cholesteatoma At Chole2016 the joint EAONO JOS consensus document was presented to the international scientific community for the first time It led to a lively and productive discussion A consensus document on classification and staging of cholesteatoma has since been produced The Proceedings of Chole2016 is available in paper book as well as a PDF enhanced PDF with links and EPUB optimized for tablets The electronic versions are freely downloadable for all If you want a copy paper book Kugler Publications can also provide POD Publishing on Demand copies for a reasonable price Finally I am very much looking forward to seeing all of you at the 11th Conference in Shanghai in 2020 Matthew Yung

Surgery of the

Skull Base Madjid Samii, Wolfgang Draf, 2012-12-06 The region of the skull base was long considered a surgical barrier because of its complex anatomy With few exceptions the region immediately beyond the dura or bony skull base constituted a no man's land for the surgeon working from the other direction A major reason for this was the high morbidity associated with operative procedures in that area using traditional dissection techniques This situation changed with the advent of the operating microscope Used initially by ear nose and throat specialists for resective and reconstructive surgery of the petrous bone and paranasal sinuses the operating microscope was later introduced in other areas and neurosurgeons began using it in the mid 1960s With technical equality thus established the groundwork was laid for taking a new systematic and interdisciplinary approach to surgical problems of the skull base Intensive and systematic cooperation between ear nose and throat surgeons and neurologic surgeons had its origins in the departments of the University of Mainz kindly supported by our chairmen Prof Dr Dr hc Kurt Schiirrmann Department of Neurosurgery and Prof Dr W Kley Department of Ear Nose and

Throat Diseases Head and Neck Surgery The experience gained from this cooperation was taught in workshops held in Hannover from 1979 to 1986 acquiring a broader interdisciplinary base through the participation of specialists from the fields of anatomy pathology neuroradiology ophthalmology and maxillofacial surgery
