Kettle,2012-12-06 It is now more than twenty years since a proposal was first mooted to hold an

international tunnelling symposium in Britain At the time of the first symposium held in London in 1976 the Channel Tunnel project had just been shelved Last weekend a charity walk was held in the finished tunnel which will be open for business later in the year Tunnels have figured prominently and at times spectacularly in the development of national and international links and it is hoped that such links gather pace in the future It is particularly pleasing that Alastair Biggart of Storebrelt has agreed to deliver the twenty sixth Sir Julius Wernher Memorial Lecture of the Institution of Mining and Metallurgy entitled The changing face of tunnelling at the start of this event Although almost every edition of the technical journals on tunnelling reports another 1 billion scheme somewhere in the world it would be unfair of me to suggest that tunnelling is restricted to these prestigious schemes for major transport links Much of the work that makes modern life possible receives hardly a mention outside the technical press and one suspects that society at large applies the out of sight out of mind attitude even more readily to underground construction than it does to other forms of engineering Clearly there is a continuing need to improve the capacity and performance of our infrastructure while having a careful regard for the environment

Surface and Underground Excavations Ratan Raj Tatiya, 2005-08-18 This comprehensive text explores the technologies and developments in excavations for any type of surface or underground excavation The first several chapters cover unit operations including drilling explosives and blasting mucking haulage hoisting and supports and reinforcement The book then describes excavation techniques for various operations such as tunneling raising sinking drifting stoping quarrying and surface mining underground mining pillar blasting and liquidation It also examines the design planning and analysis of excavations as well as the construction of surface and subsurface excavations such as caverns Case studies focus on heavy underground blasting during pillar recoveries
