COURSE DESCRIPTION

The field of digital media continues to be propelled forward by technological
advances, making it essential for artists, designers, and media producers to expand
their technical knowledge and skillset in order to fully participate. This course
introduces basic programming concepts and methodologies that will be applied to
the creation and manipulation of information, images, animation, and sound.
Students will gain the knowledge and skills needed to fully participate in digital
media production.

My personal goal for you is that you will not only understand how to program, but
you will begin to appreciate its relevance in today's digital media landscape.

This course is technical and can be challenging for many students. If you find
yourself struggling, please let me know as soon as possible as waiting will only
compound the problem.

If you are familiar with programming and are concerned that this class won't be
beneficial and/or challenging for you, please see me so that we can ensure that this
course is a useful experience.

COURSE CONTENT

In this class I reserve the right to show a broad range of course materials, some of
which assume the audience to be adult in age and demeanor. Should you feel of-
fended by something you have seen or heard, I would appreciate you staying to be
part of a dialogue as I welcome your perspective. If you feel that you cannot stay,
feel free to excuse yourself from the classroom as discreetly as possible.

COURSE WEBSITE

For this class, we will be using Edmodo.com. On this site you will find a course
calendar, assignments, resources, and grades. Additionally, this is where you will
submit your labs and projects. I will send an invitation to registered students after the
first class.

EMAIL

You must use your Colorado.edu email account for this course. Please check your
email and the class website regularly. I will notify you of all class cancellations and
scheduling changes via the class website and/or email. It is my goal to respond to all
emails within 24 hours. If I fail to reply within 24 hours, feel free to resend.

CLASS STRUCTURE

This will be a semi-flipped classroom. Before class, I will assign readings and Khan
Academy tutorials. You will be expected to have completed this "prep-material"
before the start of class. The prep-material readings will introduce you to the new
material and the Khan Academy tutorials will give you practice programming with
these new concepts.

In class we will work through various "challenges" that will go a little more in-depth
with the material and will solidify your knowledge of the material. You will be
assigned a lab that will be a creative or practical application of the new material.
