The International Handbook of Collaborative Learning Cindy Hmelo-Silver, Clark Chinn, Carol Chan, Angela O'Donnell, 2013-03-05 Collaborative learning has become an increasingly important part of education but the research supporting it is distributed across a wide variety of fields including social cognitive developmental and educational psychology instructional design the learning sciences educational technology socio cultural studies and computer supported collaborative learning The goal of this book is to integrate theory and research across these diverse fields of study and thereby to forward our understanding of collaborative learning and its instructional applications The book is structured into the following 4 sections 1 Theoretical Foundations 2 Research Methodologies 3 Instructional Approaches and Issues and 4 Technology Key features include the following Comprehensive and Global This is the first book to provide a comprehensive review of the widely scattered research on collaborative learning including the contributions of many international authors Cross disciplinary The field of collaborative learning is highly interdisciplinary drawing scholars from psychology computer science mathematics education science education and educational technology

Within psychology the book brings together perspectives from cognitive social and developmental psychology as well as from the cross disciplinary field of the learning sciences Chapter Structure To ensure consistency across the book authors have organized their chapters around integrative themes and issues Each chapter author summarizes the accumulated literature related to their chapter topic and identifies the strengths and weaknesses of the supporting evidence Strong Methodology Each chapter within the extensive methodology section describes a specific methodology its underlying assumptions and provide examples of its application This book is appropriate for researchers and graduate level instructors in educational psychology learning sciences cognitive psychology social psychology computer science educational technology teacher education and the academic libraries serving them It is also appropriate as a graduate level textbook in collaborative learning computer supported collaborative learning cognition and instruction educational technology and learning sciences

Gameworld Interfaces Kristine Jorgensen, 2013-12-20 An investigation into computer game interfaces both naturalistic and symbolic and the distinction between gameworlds and other kinds of fictional worlds Computer games usually take one of two approaches to presenting game information to players A game might offer information naturalistically as part of the game's imaginary universe or it might augment the world of the game with overlays symbols and menus In this book Kristine Jorgensen investigates both kinds of gameworld interfaces She shows that although the naturalistic approach may appear more integral to the imaginary world of the game both the invisible and visible interfaces effectively present information that players need in order to interact with the game and its rules The symbolic less naturalistic approach would seem to conflict with the idea of a coherent autonomous fictional universe but Jorgensen argues gameworlds are not governed by the pursuit of fictional coherence but by the logics of game mechanics This is characteristic of gameworlds and distinguishes them from other traditional fictional worlds Jorgensen investigates gameworld interfaces from the perspectives of both game designers and players She draws on interviews with the design teams of Harmonix Music producer of Rock Band and other music games and Turbine Inc producer of such massively multiplayer online games as Lord of the Rings Online many hours of gameplay and extensive interviews and observations of players The player studies focus on four games representing different genres Crysis Command Conquer 3 Tiberian Wars The Sims 2 and Diablo 2 Finally she presents a theory of game user interfaces and considers the implications of this theory for game design

Usability of Complex Information Systems Michael Albers,Brian Still,2010-10-15 Why do enterprise systems have complicated search pages when Google has a single search box that works better Why struggle with an expense reimbursement system that is not as easy as home accounting software Although this seems like comparing apples to oranges as information and communication technologies increasingly reach into every industry **Traversing the Doctorate** Tanya M. Machin,Marc Clarà,Patrick Alan Danaher,2019-09-23 This book explores the multiple ways in which doctoral programs are traversed by students supervisors and administrators Rather than proposing a single homogeneous approach as the most effective form of doctoral education the editors and contributors focus on the diversity of global approaches to the doctorate

including doctoral experiences from Australia Finland Chile New Zealand and Spain The doctorate emerges from this analysis as a highly complex heterogeneous and situated phenomenon that resists easy solutions Strategies that are successful in traversing the doctorate are found to be grounded in contexts that cannot necessarily be generalised to other situations in doing so the authors emphasise the importance of presenting a diverse array of experiences and stories The separate and shared perspectives of doctoral students supervisors and administrations are mapped and analysed in ways that bring their voices compellingly to life this book will be of interest and value to students and scholars of the doctoral journey as well as of international and comparative education

Design and Emotion Moves Pieter M.A. Desmet, Jeroen van Erp, MariAnne Karlsson, 2020-11-09 *Design Emotion Moves* is an edited collection of papers presented at the 5th international Design and Emotion Conference in Gothenburg Sweden In spite of the wide variety of angles and approaches all authors share the basic proposition that in order to understand users or consumers and their behaviour one must understand the affective responses that are involved in the processes of buying using and owning products The book should appeal to anyone interested in understanding emotions involved in human product relationships and in techniques that can help utilising these insights in design practice

Designing for Learning in an Open World Gráinne Conole,2012-09-21 The Internet and associated technologies have been around for almost twenty years Networked access and computer ownership are now the norm There is a plethora of technologies that can be used to support learning offering different ways in which learners can communicate with each other and their tutors and providing them with access to interactive multimedia content However these generic skills don't necessarily translate seamlessly to an academic learning context Appropriation of these technologies for academic purposes requires specific skills which means that the way in which we design and support learning opportunities needs to provide appropriate support to harness the potential of technologies More than ever before learners need supportive learning pathways to enable them to blend formal educational offerings with free resources and services This requires a rethinking of the design process to enable teachers to take account of a blended learning context **Simulation and Gaming in the**

Network Society Toshiyuki Kaneda,Hidehiko Kanegae,Yusuke Toyoda,Paola Rizzi,2016-08-02 This book provides the state of the art in the simulation and gaming study field by systematically collecting excellent papers presented at the 46th International Simulation and Gaming Association annual conference held in Kyoto 17 25 July 2015 Simulation and gaming has been used in a wide variety of areas ranging from early childhood education and school age children universities and professional education to policy exploration and social problem solving Moreover it now been drastically changing its features in the Internet Of Things IOT society while taking over a wide variety of aliases such as serious games and gamification Most of the papers on which this book's chapters are based were written by academic researchers both up and coming and well known In addition simulation and gaming is a translational system science going from theory to clinical cross disciplinary topics With this book therefore graduate students and higher level researchers educators and practitioners can become familiar with the state of the art academic research on simulation and gaming in the network society of the twenty first century Activity Theory in Formal and Informal Science Education Katerina Plakitsi,2013-09-04 The purpose of this book is to establish a broader context for rethinking science learning and teaching by using cultural historical activity

theoretic approach Activity theory already steps in its third generation and only a few works have been done on its applications to science education especially in Europe The context takes into account more recent developments in activity theory applications in US Canada Australia and Europe The chapters articulate new ways of thinking about learning and teaching science i e new theoretical perspectives and some case studies of teaching important scientific topics in for compulsory education The ultimate purpose of each chapter and the collective book as a whole is to prepare the ground upon which a new pedagogy in science education can be emerged to provide more encompassing theoretical frameworks that allow us to capture the complexity of science learning and teaching as it occurs in and out of schools The book captures the dialogic and interactive nature of the transferring the activity theory to both formal and informal science education It also contributes to the development of innovative curricula school science textbooks educational programs and ICT s materials As a whole the book moves theorizing and practicing of science education into new face and uncharted terrain It is recommended to new scholars and researchers as well as teachers researchers

Theoretical Investigations Gerry Stahl, 2021-04-23 Computers have transformed how we think discuss and learn as individuals in groups within cultures and globally However social media are problematic fostering flaming culture wars and fake news This volume presents an alternative paradigm for computer support of group thinking collaborative learning and joint knowledge construction This requires expanding concepts of cognition to collectivities like collaborative groups of networked students Theoretical Investigations explores the conditions for group cognition supplying a philosophical foundation for new models of pedagogy and methods to analyze group interaction Twenty five self contained investigations document progress in research on computer supported collaborative learning CSCL both in Stahl s own research and during the first decade of the CSCL journal The volume begins with two new reflections on the vision and theory that result from this research Representing both ethnomethodological and social constructivist research paradigms the investigations within this volume comprise a selection of seminal and influential articles and critical commentaries that contribute to an understanding of concepts and themes central to the CSCL field The book elaborates an innovative theory of group cognition and substantiates the pedagogical potential of CSCL Theoretical Investigations Philosophical Foundations of Group Cognition is essential as a graduate text for courses in educational theory instructional design learning and networked technologies The investigations will also appeal to researchers and practitioners in those areas
