**Professional Development That Sticks** Fred Ende, 2016-02-22 How can we approach professional development in a thoughtful way keep teachers motivated and make the process worthwhile It s a truth that school leaders can t deny teachers tend to think of PD as a distraction from the real work of the classroom as something to get through instead of an opportunity to engage learn and grow as professionals Too often they re absolutely right When PD is packaged as a one size fits all one and done experience even content that teachers might greet with enthusiasm won t stay with them for long It just doesn t stick In Professional Development That Sticks Fred Ende makes the case for a better approach one that melds traditional PD structures with personalized learning Here school leaders will find a framework for developing professional learning experiences that spark and maintain teacher motivation and lead to real changes in practice Ende s three stage professional development for learning PDL process covers critical aspects of planning providing and following up In addition PDL s Think Act and Reflect method ensures your teachers will acquire meaningful deep sticky learning that lasts

**Making a Positive Impact in Rural Places** R. Martin Reardon, Jack Leonard, 2018-03-01 Following on from the preceding volume in this series that focused on innovation and implementation in the context of school university community collaborations in rural places this volume explores the positive impact of such collaborations in rural places focusing specifically on the change agency of such collaborations The relentless demand of urban places in general for the food and resources e g mineral and energy resources originating in rural places tends to overshadow the impact of the inevitable changes wrought by increasing efficiency in the supply chain Youth brought up in rural places tend to gravitate to urban places for higher education and employment social interaction and cultural affordances and only some of them return to enrich their places of origin On one hand the outcome of the arguable predominance of more populated areas in the national consciousness has been described as urban normativity a sense that what happens in urban areas is the norm By implication rural areas strive to approach the norm On the other hand a mythology of rural places as repositories of traditional values while flattering fails to take into account the inherent complexities of the rural context The chapters in this volume are grouped into four parts the first three of which explore in turn collaborations that target instructional leadership increase opportunities for underserved people and target wicked problems The fourth part consists of four chapters that showcase international perspectives on school university community collaborations between countries Australia and the United States within China within Africa and within

Australia The overwhelming sense of the chapters in this volume is that the most compelling evidence of impact of school university community collaborations in rural places emanates from collaborations brokered by schools communities to which universities bring pertinent resources
