Corrections and Sentencing Forward Pamela K. Lattimore,Beth M. Huebner,Faye S. Taxman,2020-11-10 This volume
addresses major issues and research in corrections and sentencing with the goal of using previous research and findings as a
platform for recommendations about future research evaluation and policy The last several decades witnessed major policy
changes in sentencing and corrections in the United States as well as considerable research to identify the most effective
strategies for addressing criminal behavior These efforts included changes in sentencing that eliminated parole and imposed
draconian sentences for violent and drug crimes The federal government followed by most states implemented sentencing
guidelines that greatly reduced the discretion of the courts to impose sentences The results were a multifold increase in the
numbers of individuals in jails and prisons and on community supervision increases that have only recently crested There
were also efforts to engage prosecutors and the courts in diversion and oversight including the development of prosecutorial
diversion programs as well as a variety of specialty courts Penal reform has included efforts to understand the transitions
from prison to the community including federal led efforts focused on reentry programming Community corrections reforms

have ranged from increased surveillance through drug testing electronic monitoring and in some cases judicial oversight to rehabilitative efforts driven by risk and needs assessment More recently the focus has included pretrial reform to reduce the number of people held in jail pending trial efforts that have brought attention to the use of bail and its disproportionate impact on people of color and the poor This collection of chapters from leading researchers addresses a wide array of the latest research in the field A unique approach featuring responses to the original essays by active researchers spurs discussion and provides a foundation for developing directions for future research and policymaking *Monthly Catalog of United States Government Publications*, 1995 Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1995 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index Sexual Violence Elizabeth L. Jeglic, Cynthia Calkins, 2016-10-24 The purpose of this edited volume is to examine the disconnect in the sexual violence prevention field between legislation research and practice The work is focused primarily on United States policies and initiatives with key case studies internationally Contributions show that current policies are mainly based on repeat offenders residence restrictions registration and notification statutes and post sentence initiatives While these initiatives address public fears they are not evidence based and do not necessarily reduce offending Research shows that post sentence policies may destabilize offenders and limit their ability to reintegrate with society at a critical period therefore increasing the chances of recidivism Furthermore the majority of sex crimes 95% are committed by first time offenders This innovative book is divided into two parts juxtaposing what is currently being done legislatively with what the research evidence suggests would be best practice Roadside Revegetation David E. Steinfeld, 2007 Native plants are a foundation of ecological function affecting soil conservation wildlife habitat plant communities invasive species and water quality Establishing locally adapted self sustaining plant communities can also support transportation goals for safety and efficiency Past obstacles to establishing native plant communities on roadsides have been technical informational and organizational Effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners Multiple disciplines ranging from engineering to soil science ecology botany and wildlife science must be able to work cooperatively not in isolation This report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road modifications It guides readers through a comprehensive process of 1 initiating 2 planning 3 implementing and 4 monitoring a roadside revegetating project with native plants **Hay and Forage Harvesting** Allen R.
