Swenson, 2011-01-01 Business Process Management and Workflow are by their very nature social activities The collaboration and communication patterns that are

now increasingly referred to as social computing were also fundamental to the BPM and workflow models of the early 1990s. Yet it has been the recent explosion of social computing and accompanying success of social production from Linux to Wikipedia and Facebook to Twitter which have had the most dramatic impact on collaboration in business environments. Today we see the transformation of both the look and feel of BPM technologies along the lines of social media as well as the increasing adoption of social tools and techniques democratizing process development and design. It is along these two trend lines the evolution of system interfaces and the increased engagement of stakeholders in process improvement that Social BPM has taken shape.

How Knowledge Workers Get Things Done Nathaniel Palmer, Max J. Pucher, 2012-01-01

Highly predictable work is easy to support using traditional programming techniques while unpredictable work cannot be accurately scripted in advance and thus requires the involvement of the knowledge workers themselves. The core element of Adaptive Case Management (ACM) is the support for real time decision making by knowledge workers. *How Knowledge Workers Get Things Done* describes the work of managers, decision makers, executives, doctors, lawyers, campaign managers, emergency responders, strategists and many others who have to think for a living. These are people who figure out what needs to be done at the same time that they do it and there is a new approach to support this. This presents the logical starting point for understanding how to take advantage of ACM. Keith Swenson points out: "We are seeing a fundamental shift in our workforce and in the ways they need to be managed. Not only are companies engaging their customers in new ways but managers are engaging workers in similarly transformed ways." In award winning case studies covering industries as diverse as law enforcement, transportation, insurance, banking, state services and healthcare you will find instructive examples for how to transform your own organization. This important book follows the ground breaking ACM publications *Taming the Unpredictable* and *Mastering the Unpredictable* and provides important papers by thought leaders in this field together with practical examples, detailed ACM case studies and product reviews.

Potenziale und Herausforderungen des Geschäftsprozessmanagements im Enterprise 2.0 unter der Berücksichtigung der Dynamik unternehmerischer Systeme Boris Dombrowski, 2011. Hochkomplexe und volatile Entwicklungen prägen das heutige unternehmerische Umfeld. Durch dynamisch begründeten Problemstellungen werden aber nur unzureichend anhand unternehmerischer Systeme und Prozesse reflektiert. Zwei Disziplinen, das Geschäftsprozessmanagement und das Enterprise 2.0, sind an der Schnittstelle zwischen wirtschaftswissenschaftlichen und technologischen Fragestellungen als interdisziplinäre Konzepte der Wirtschaftsinformatik positioniert. Beide Konzepte erscheinen als vielversprechende Mittel zur Leistungssteigerung unternehmerischer Prozesse. Vor diesem Hintergrund wird die Frage adressiert, welche Potenziale und Herausforderungen sich bei einer Konvergenz der beiden Disziplinen ergeben, um eine defizitäre Unterstützung dynamisch induzierter Geschäftsprozesse abzuschwächen oder zu kompensieren. Defizite des klassischen Geschäftsprozessmanagements und Potenziale des Geschäftsprozessmanagements im Enterprise 2.0 werden herausgearbeitet und anhand eines praktischen Szenarios reflektiert. Die Zusammenführung etablierter regelorientierter Konzepte mit neuen hochflexiblen Mechanismen ist für Unternehmen jedoch mit einem Wandel in organisationalen Denkweisen und Kulturen verbunden. Der Autor analysiert die Potenziale und Herausforderungen, die sich durch eine Zusammenführung von Geschäftsprozessmanagement und glq Enterprise 2.0 grq für die Unterstützung unternehmerischer Prozesse ergeben. Er kombiniert dazu theoretische Erkenntnisse aus der Literatur mit seinen eigenen Praxiserfahrungen im Rahmen seiner Tätigkeit als Projektmanager und Consultant und schafft es so einen wichtigen Beitrag zum jungen Thema glq Enterprise 2.0 grq zu leisten.
