From Compliance to Learning Husein Abdul-Hamid, Sarah Mintz, Namrata Saraogi, 2017-04-13

From Compliance to Learning A System for Harnessing the Power of Data in the State of Maryland builds on a 2015 World Bank report that assessed Education Management Information Systems EMISs in the state of Maryland That report uncovered a successful system and this one expands on lessons learned and ways to apply them in practice The goal of this study is to distill Maryland s good practices in education data systems and share them in a way that is useful to education stakeholders interested in harnessing the power of data to strengthen learning outcomes This study also examines the history of education data collection and use in the United States with a focus on Maryland including a review of federal and state legislation that has helped to shape Maryland s education data policies and systems In the digital age information is power When information is effectively harnessed and aligned with student learning it carries the potential to radically transform the delivery of education as well as the sector as a whole Increasingly education systems are moving away from using education data narrowly for compliance purposes instead they are embracing data as a tool to drive systemwide innovation professionalization and most importantly learning Whether to prioritize and optimize data and information systems around student learning is no longer an option it is imperative for education systems that aim to excel and achieve strong learning outcomes Over the past several decades fundamental shifts have occurred in the way that education data are collected managed and used Today real time learning data inform classroom instruction predictive analytics identify at risk youth before they drop out of school and data from preschool to workforce are linked to help guide education reforms These represent just a few of the innovative ways that schools and other stakeholders across the United States are harnessing data to improve education The state s success in establishing an enabling environment for education data systems and data utilization has built a strong foundation Maryland effectively aligned a complex statewide data system to deliver value Prioritization of integration and alignment was key The state then launched a longitudinal data system center that would drive an adaptive education system with insights that track students from pre kindergarten to entry in the workforce Data across the state are high quality and follow strict rules to preserve privacy and enhance security Maryland s utilization of data also offers valuable lessons The statewide data system supports policy makers and decision makers in planning and management as well as teachers students and families in instruction and learning Consistent across Maryland s structuring and use of data systems were a strong vision and a road map to execute that vision Maryland s journey offers many lessons not only for countries with advanced data systems but also for those in less developed stages While the technology and information exist to achieve data for learning harnessing data within the right information system and ensuring utilization are challenging endeavors An array of factors must align leadership policies processes and resources to name a few to effectively harness data to support and drive strong learning outcomes

Handbook Of Electrical Steel

Goran Engdahl, 2021-10-13 This book contains all information regarding magnetism and magnetic materials that an electrical engineer needs to know to be able to understand and design magnetic devices The handbook comprises chapters comprising basic electromagnetism basic quantum mechanics ferromagnetism magnetic materials magnetic material characterization modeling of magnetic materials and magnetic design A comprehensive description of the physical origin of magnetism of materials is given chapter two and a thorough review of the physics behind ferromagnetism is given in chapter three All chapters are written in a textbook fashion such that they can easily be assimilated separately The book gathers in an understandable the multidisciplinary topic of magnetism and magnetic materials in way that it can serve as a comprehensive introduction to engineers that considers use of magnetic materials in their designs The book covers all major modeling techniques of magnetic materials including the well known Preisach Jiles Atherton and lag models General magnetic design approaches including major and new design tools also are presented The book also serves as a guideline regarding the choice of feasible materials in specific applications regarding both soft and hard magnetic materials with an inventory of alternatives to electrical steel Relevant performance criteria then are given such that appropriate materials can be selected The final chapter offers a list of current electrical steel and magnetic material suppliers *Tools and Methods of Program Analysis* Vladimir Itsykson, Andre Scedrov, Victor Zakharov, 2017-12-29 This book constitutes the refereed proceedings of the 4th International Conference on Tools and Methods for Program Analysis TMPA 2017 Moscow Russia March 3 4 2017 The 12 revised full papers and 5 revised short papers presented together with three abstracts of keynote talks were carefully reviewed and selected from 51 submissions The papers deal with topics such as software test automation static program analysis verification dynamic methods of program analysis testing and analysis of parallel and distributed systems testing and analysis of high load and high availability systems analysis and verification of hardware and software systems methods of building quality software tools for software analysis testing and verification **Cloud Computing and Security** Xingming Sun, Han-Chieh Chao, Xingang You, Elisa Bertino, 2017-10-30 This two volume set LNCS 10602 and LNCS 10603 constitutes the thoroughly refereed post conference proceedings of the Third International Conference on Cloud Computing and Security ICCCS 2017 held in Nanjing China in June 2017 The 116 full papers and 11 short papers of these volumes were carefully reviewed and selected from 391 submissions The papers are organized in topical sections such as information hiding cloud computing IOT applications information security multimedia applications optimization and classification Gale Guide to Internet Databases Gale Group, 1999-11 This directory tells how to access and retrieve more than 5 000 Interact databases approximately 1 000 new databases have been added for this 5th edition Five comprehensive indexes master subject host provider white pages and alternate format provide quick access to the desired database The Hanson Guide to the Internet & Internet Databases, 2000 *IEEE Membership Directory* Institute of Electrical and Electronics Engineers, 1989 Penn State Alumni Directory, 2010 **Who's Who in Finance and Business** Marquis Who's Who, LLC, National
