Eckersall, Ingrid Miller, Jenny Renaut, Paola Roncada, Romana Turk, 2023-09-04 Proteomics is the large scale study of the proteome i.e. a set of proteins being expressed in a certain fluid tissue organ or organism The value of this advanced technology is being recognised in farm animal and veterinary sciences from farm to fork The potential of proteomics is unequivocal in holding a significant promise in applications such as vaccine and drug development physiology toxicology animal product quality and food safety Proteomics has been growing steadily during the last 3 4 years and as time goes by

proteomics based studies are more and more common not just to scientists but to the general public as well unravelling the full potential of this innovative technology This book reflects the will of a group of multi disciplinary scientists that merge innovation with excellence of research and to whom the dissemination of knowledge and discovery through cooperation is a key point It is of interest to scientists at the early stages of their careers as well as to researchers well established in the field and to whom proteomics may be the necessary next step towards more in depth research activities By providing a collection of diverse scientific interests Farm Animal Proteomics 2014 demonstrates the vitality of the area and the importance it holds to animal and food research to science industry government agencies the consumer and ultimately the society as a whole

Digestive Physiology and Metabolism in Ruminants Y. Ruckebusch,P. Thivend,2012-12-06 Two questions could not be avoided in the avant propos of this book i what is the importance to man of ruminant livestock and ii what results of practical relevance in the growing mountain of scientific verbiage could be found in the Proceedings of this Symposium Herbivores are an integral and critical part of the natural ecosystem which must be preserved because of their impact on human welfare What makes ruminants especially important to man is that they can thrive on fibrous forage and are thus the only viable enterprise over much of the earth's surface where crop growing is impracticable They contribute a wide array of products in addition to 50000 000 tonnes of meat 1977 and represent a capital reserve that can be drawn upon in times of emergency milk for example 450000000 tonnes can make the difference between subsistence and starvation About 60% of the world's meat and 80 % of the milk are produced by one third of the world ruminant population in the developed regions and as much as 99 % of the power for agriculture is provided by the ruminant population in developing countries For the next two decades a probable increase by 30 % for cattle and buffalo and more than 40 % for sheep and goats is expected by improving health fertility nutrition and genetic potential rather than feed resources Extension Bulletin ,1940 **The Laboratory Swine** Peter J. A. Bollen,Axel K. Hansen,Aage K Olsen Alstrup,2010-02-22 Addressing the biology husbandry management veterinary care and research applications of both large and miniature swine this color resource is renowned as the laboratory reference on swine It is thoroughly updated and includes a major revision to the anesthetics section It also places a heightened focus on animal welfare and addresses important considerations related to genetically modified swine The Laboratory Swine Second Edition is ideal for animal caretakers technicians investigators and laboratory animal veterinarians as a single source reference that contributes to the humane care and use of swine in research
